3D measurements WITH MEASURING ARM

Hexagon ARM 8735 + scanner AS1

Suitable for fast and accurate 3D Scanning.

- Fast combined solution for 3D scanning and probe measurement
- Ability to scan glossy surfaces with high precision
- No powdering required to prepare the surface to be measured

PREMIUM
3D METROLOGY
DEVICES

MEASUREMENT IN OUR LABORATORIES

3D scanning and measurement in our ISO/IEC 17025: 2017 accredited metrological laboratories

MEASUREMENTS AT YOUR PRODUCTION SITE

Accredited ISO/IEC 17025: 2017 3D scanning and measurement right at your production site.

OTHER SERVICES

Buy or rent of measuring equipment, hire our 3D Technician, reverse engineering,...

3D measurements WITH LASER TRACKER

Leica Absolute Tracker AT500

Laser trackers are a great solution for measuring larger objects such as production lines, aircraft and heavy machinery in real time using laser technology and wireless probe connection with a 3D scanner.

- High-precision laser device suitable for measuring larger objects
- Measuring distance up to 160 m with micron accuracy
- Combination of laser scanner and probe measurement

Integrate of 3D MEASURING CELLS

We have extensive experience with the integration of 3D measuring cells into production processes all over the world. Our experts will be happy to advise you and propose a solution on the key.

We offer:

- > Supporting consultancy activities
- > Choosing the right solution
- > Security and system integration
- > Tuning the system

HIRE OUR EXPERIENCED 3D TECHNICIAN

- > For Polyworks, PC-DMIS and other systems
- > Possibility of hiring a 3D Technician with our measuring equipment
