

Your Partner in Industrial Automation

Company Profile

PROCONT, spol. s r.o. Prešov

MARCH, 2024

About the company

- ▶ Company has over 33 years of experience in factory automation. Our engineers realized a variety of diverse applications, from ladder logic in programmable controllers to man machine interface and PC programming.
- ▶ Our staff has the experience with installation and start-up of control system and field equipment and supervision of qualified field engineer.

Company's seat and headquarters

Manufacturing premises

Prešov,
SLOVAKIA

2022

Implementation cybersecurity into our solutions.

2010

The Company starts with deliveries of robotic workplaces and lines.

2002

Electrical and mechanical engineering and deliveries in the area of higher supplies of investment technological units..

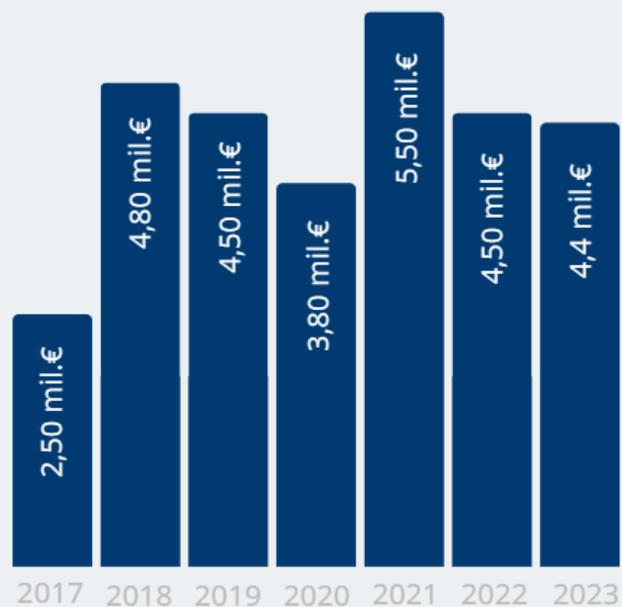

2001

The Company starts with deliveries of manipulators and automated handling solutions.

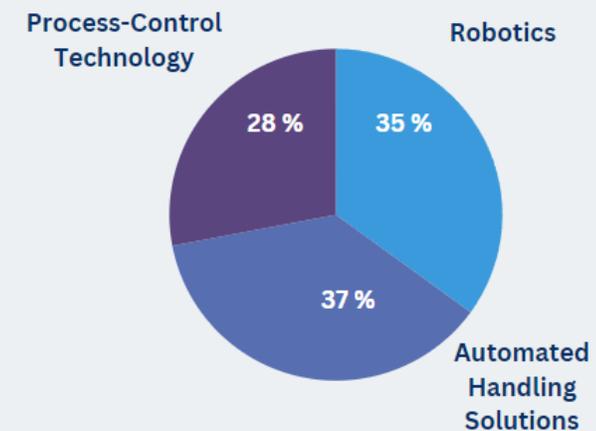

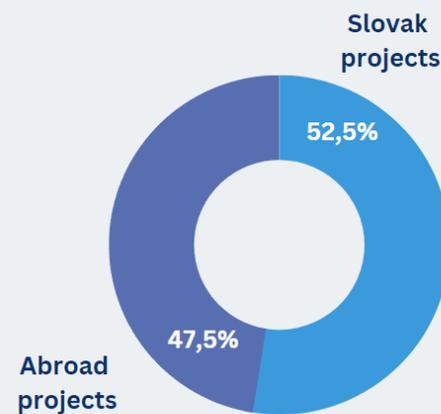

1991

Founding of the Company with focus on industrial automation.

Our Organization

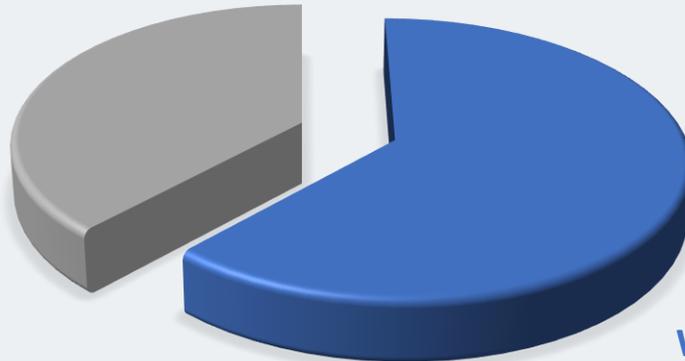

- Management - 4 HC
- Administration and Logistic - 4 HC
- Engineering - 24 HC
- Mechanical manufacturing and electrical installation - 12 HC
- External - 6 HC

Company composition

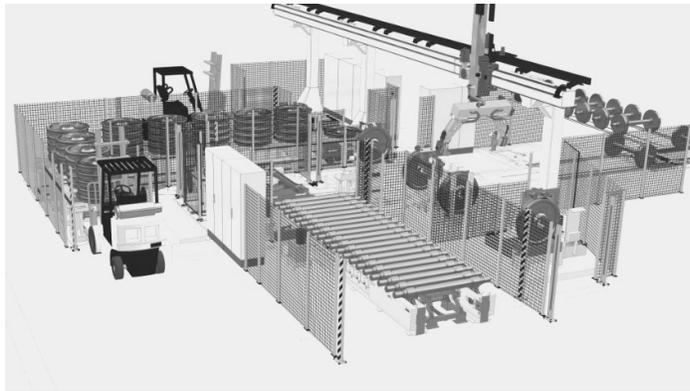

With secondary education; 19

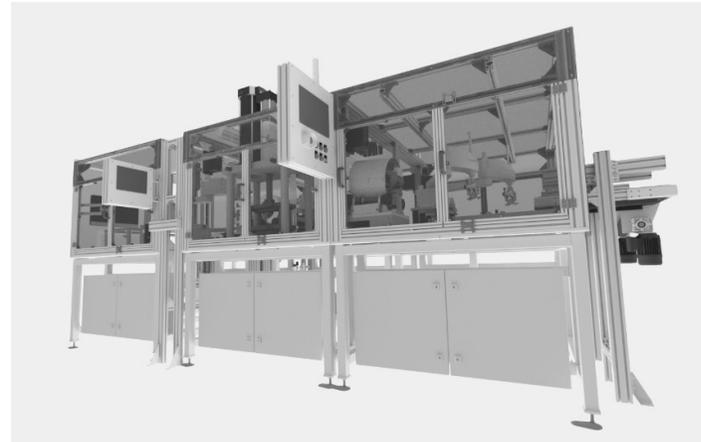

With college education; 31

Age composition
26 - 66

Our main focus

**Automated
Handling
Solutions**

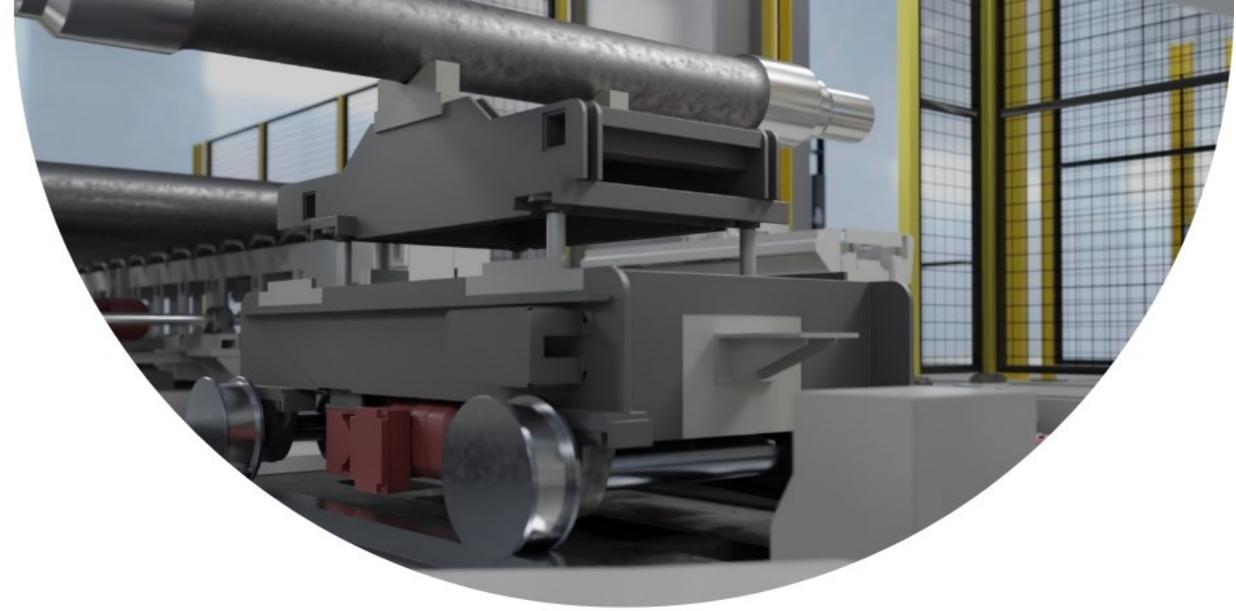

Robotics

**Process-Control
Technology**

Automated Handling Solutions

- Material handling devices are universal devices with several free or programmable axes.
- These devices consist of structural and modular elements complemented by purpose-designed grippers.
- Our company focuses on deliveries of manipulators, conveyor systems, single-purpose equipment.

Key partners:

GÜDEL

ULBRICH

MECHANICAL ENGINEERING industry

- movement between operations, inspection, transport, handling ...

WOODMAKING industry

- packaging, palletization, handling, stacking..

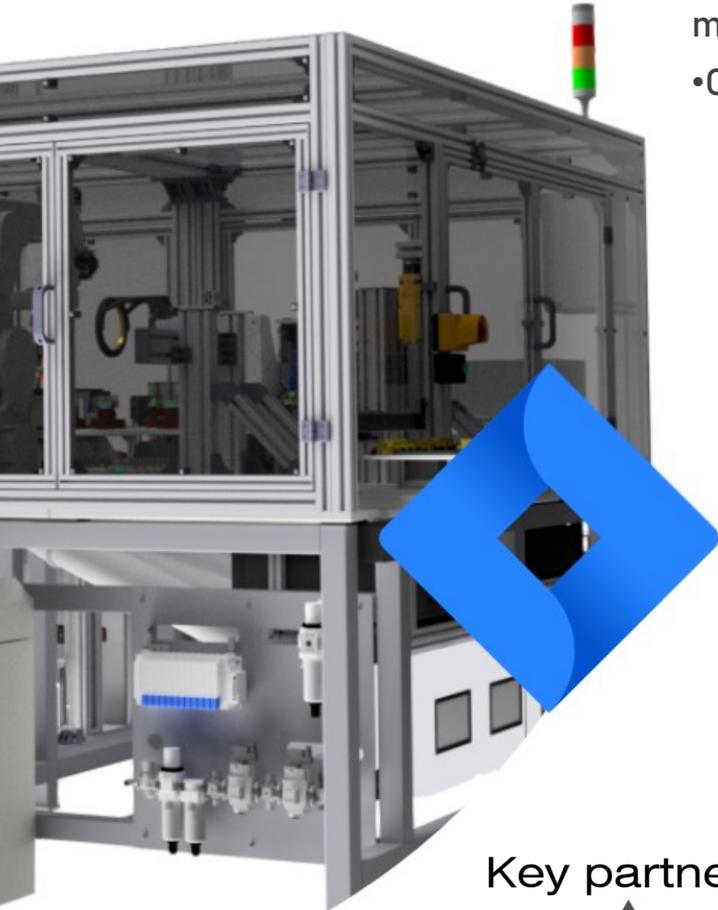

PAPER industry

- storing, stacking, control...

www.procont.sk

Robotics

- Robotics has gained competence in the key areas of sensing, cognition and control.
- It brings ever higher reliability, accuracy, productivity, quality and many other significant and important features to the industry.
- Our company focuses on the design of robotic workplaces.

AUTOMOTIVE industry

- control, testing, assembly, stacking...

ELECTRO-TECHNICAL industry

- screwing, testing, laser marking

FOOD industry

- palletization, packaging, handling...

Key partners:

Process-Control Technology

- Process-Control Technology represents industrial automation needed not only to manage and monitor processes, but also to manage and archive huge amounts of process data for a long time.
- The process management brings improvement of the company's technological processes, increased quality of final products, higher reliability, efficiency, extended life of technological equipment and, last but not least, reduced energy consumption.
- Our company focuses on deliveries software equipment, electrical installation, switchboards.

POWER industry

- heat production and distribution,
- measurement, collection, analysis and archiving of power consumption data

WATER management

- treatment and distribution of drinking water,
- wastewater treatment plants...

FOOD industry

- manufacturing of starches and starch derivatives,
- manufacturing of baked goods, salt,
- malt and beer manufacturing...

METALLURGY

- foundry lines,
- lines for surface treatment of wires,
- wire manufacturing (pulling and winding)...

Key partners:

**Rockwell
Automation**

**Schneider
Electric**

SIEMENS
