

2024 PROJECT

ECO-INNOVATION FOR
SUSTAINABLE
WASTE MANAGEMENT

EcoButt s.r.o.

Cigarette waste recycling.

CIGARETTE WASTE. ■ ?

Cigarette waste is a serious environmental problem. Smokers usually do not consider cigarettes a waste, but it's actually very dangerous:

- Filter is made out of **plastic**
- It can take 15 years to decompose
- Contain **toxic and carcinogenic substances** - pollute ecosystems
- Contaminate our water and soil

Therefore, we have decided to develop an innovation for sustainable companies. You can participate in the ecological project of cigarette waste recycling by placing EcoButt container into smoking area.

YOUR ECO PROJECT!

The environmental burden that cigarette butts cause needed to be addressed comprehensively. For this purpose, the **EcoButt** project was created in cooperation with the Technical University of Košice, We offer companies and cities an ecological solution for their waste.

In highly frequented places, we install collection containers in which **cigarette waste** is stored. On monthly basis, we take cigarette waste into our recycling company.

EcoButt products made of cigarette butts are used to build and repair asphalt communications. This ecoinnovative product replaces commonly used pulp and therefore save forests from deforestation and reuse **dangerous plastic** waste.

CIGARETTE BUTTS RECYCLING PROJECT

1

THROW THE
CIGARETTE BUTT
INTO THE CONTAINER.

2

1X A MONTH WE
WILL TAKE THE
WASTE AWAY

3

WE WILL ENSURE
ECOLOGICAL
RECYCLING.

4

WE WILL USE THE
BUTTS FOR THE
PRODUCTION OF
ASPHALT MIXTURES.

5

AND TOGETHER
WE WILL SAVE
OUR PLANET
