

JHL - PRODUKT, s.r.o., Súvoz 818, 911 01 Trenčín, Slovakia

We provide metal production of components according to specific technical drawings, manufacturing of castings, weldments, constructions, and parts for specialized automotive lines from common steel, aluminum, alloys, stainless steel, and plastic.

We offer various surface treatments – from basic painting to powder coating, zinc, nickel, and more sophisticated surface finishes.

In addition to manufacturing, we carry out the assembly of components, including electrical wiring, and 3D measurements.
