

Strategic Partnership for Long-Term Success

Company History and Legacy

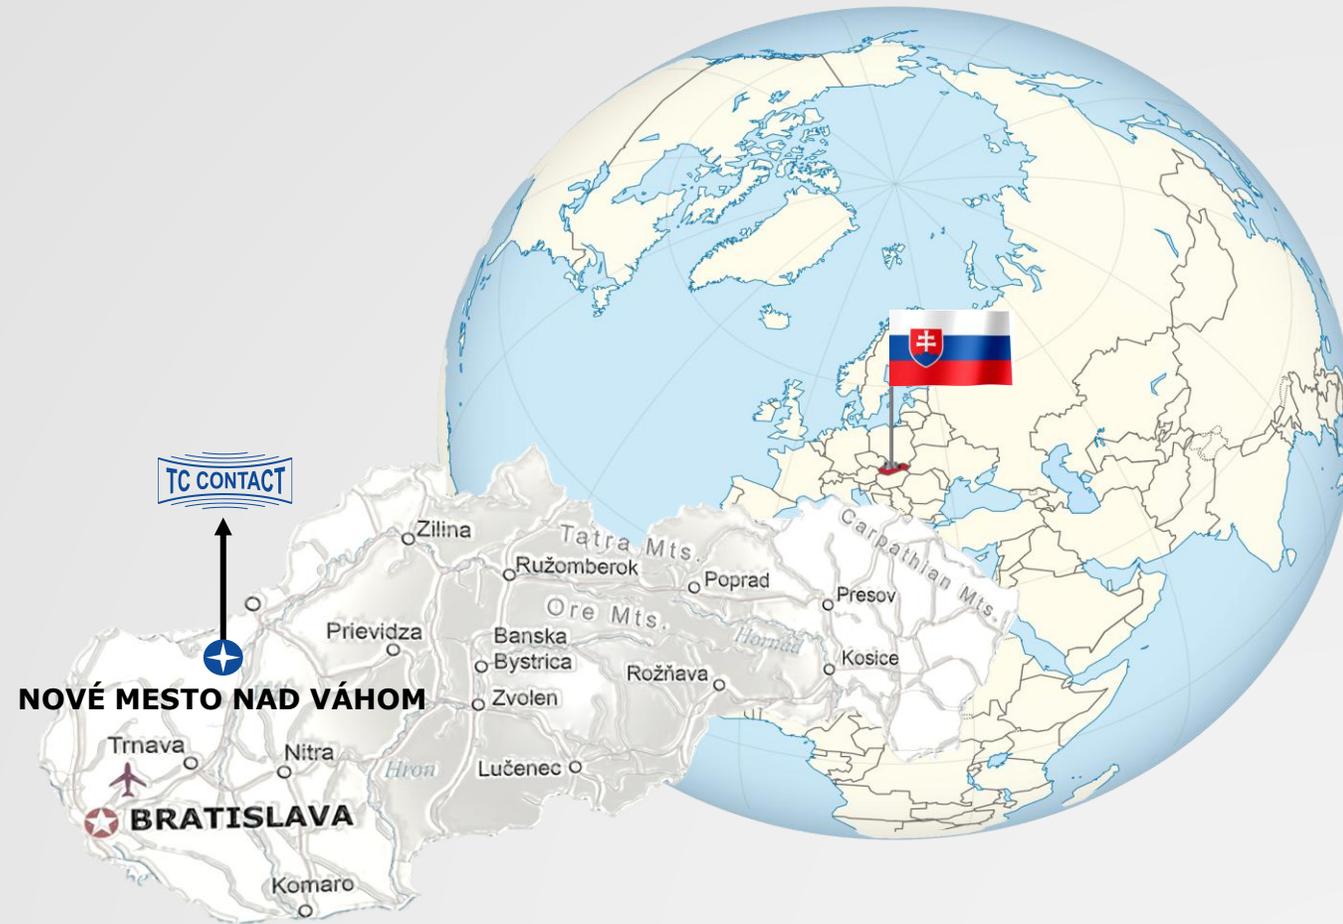

We are a leading mechanical engineering company with over **30 years of experience** in supporting our customers with the design, production, and assembly of prototype machines tailored to various industries. Our expertise includes:

- **Complete Design Proposals:** Tailored engineering solutions from concept to implementation.
- **Automated Assembly Lines:** Streamlining production with advanced automation technologies.
- **Spare Parts Production:** High-quality manufacturing of essential components.
- **State-of-the-Art Production Facility:** Operating within a 3,000 m² production hall equipped with cutting-edge machinery.
- **Employees:** 50
- **ISO 9001 Certified:** Committed to maintaining the highest standards in quality management.

Geographic Overview and Footprint

- **Nove Mesto nad Vahom** - Located in western Slovakia, within Trencin region, Population: ~ 20 000;
- Strategic location along Vah river and **conveniently accessible by highway**;
- **Established presence** of TC Contact in the region contributing to the rich industrial landscape;
- **Industrial Heritage** - Region has a rich history in engineering, construction, research and development; ; former Research Institute (VUMA) laid industrial foundations;
- **Modern Industrial Landscape - Key Sectors Present** – Engineering, Automotive equipment, logistics and construction.
- **Benefit from excellent transport links to major cities** and direct access to highway – Bratislava 100km or Vienna, Austria 160km.

Mission

Delivering Excellence.

To be your **partner delivering high quality solutions** that reduce hidden costs and drive mutual growth, guided by a long-term commitment to value creation.

Vision

Combining Family Values with Corporate Expertise.

A boutique **forward-thinking firm blending corporate expertise and family driven values** to deliver specialized machinery and R&D **solutions that contribute to your success.**

Portfolio

- design and development
- vision systems
- automation solutions
- mechanical assembly
- electro assembly
- milling (5-axis)
- turning
- grinding
- Wiring
- 3D measurement report

Automation

Single-purpose machines

Examples

Assembly station - Final inspection

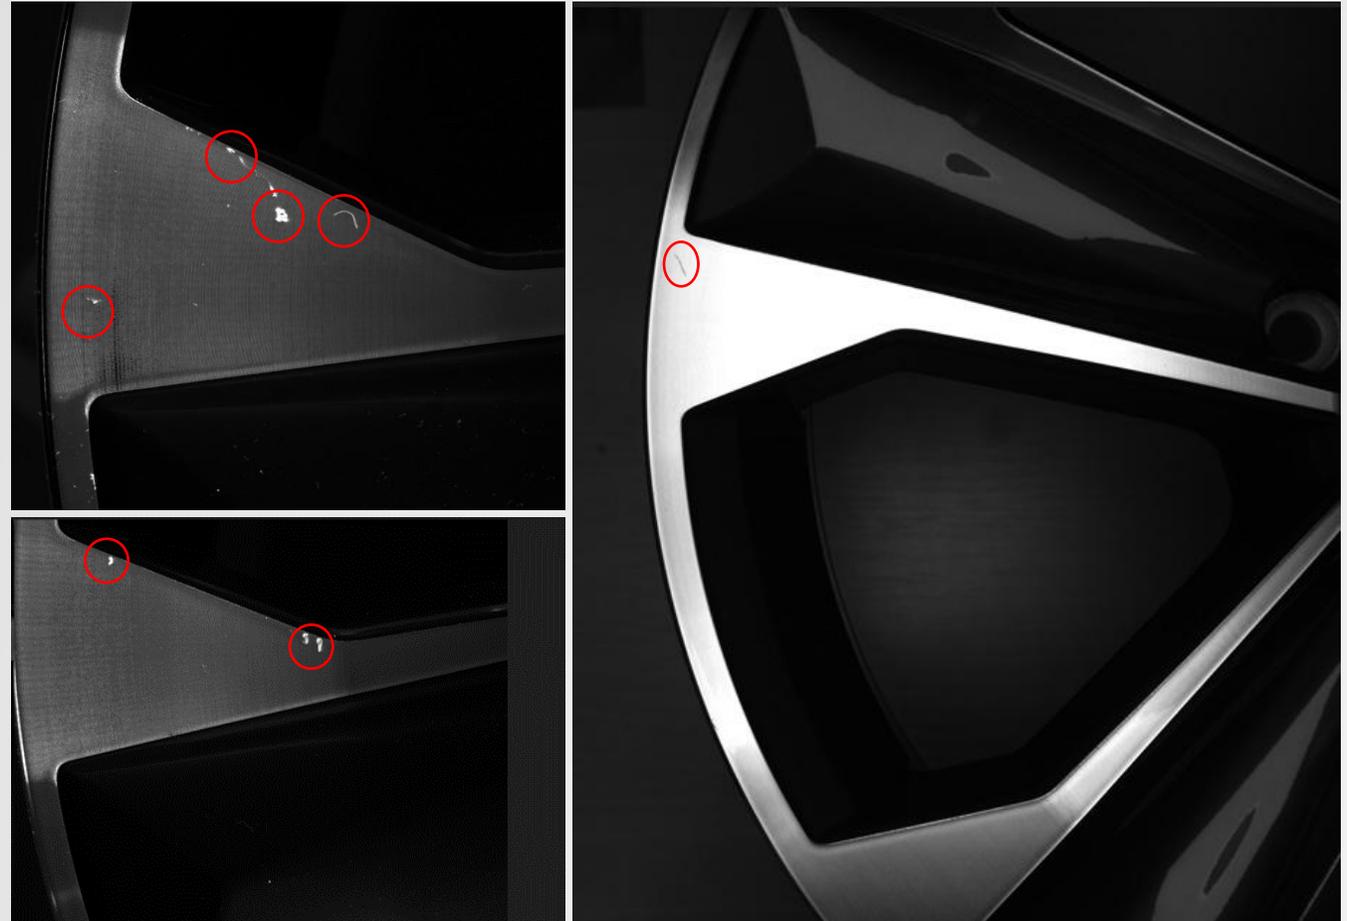

Set of inspections for car windows

- Inspection of intake residual plastic
- Distance between soldered pin
- Correct label type
- Glass color
- Trim type and color
- Blackprimer width, positioning
- Ceramic width
- Plastic pins` orientation and opening

Set of inspections

- Inspection of metal surface
- Detection of holes, cracks, scratches, dents, depressions
- Detection of color mismatch
- Detection of excess glue or paint

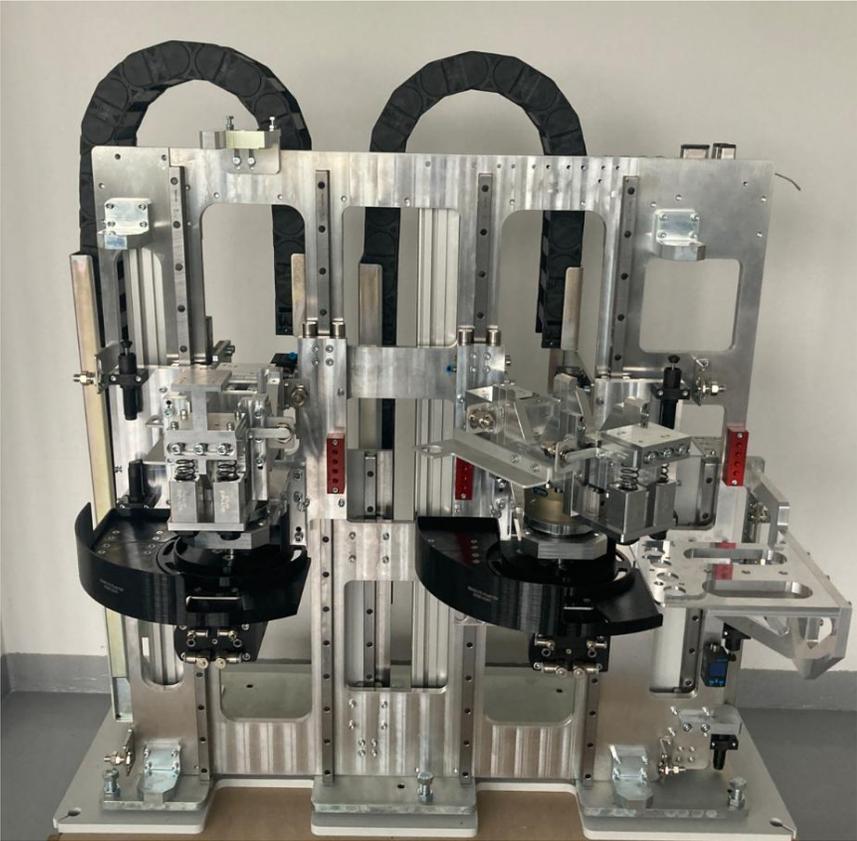

Automation

Production and assembly

Examples

Automotive

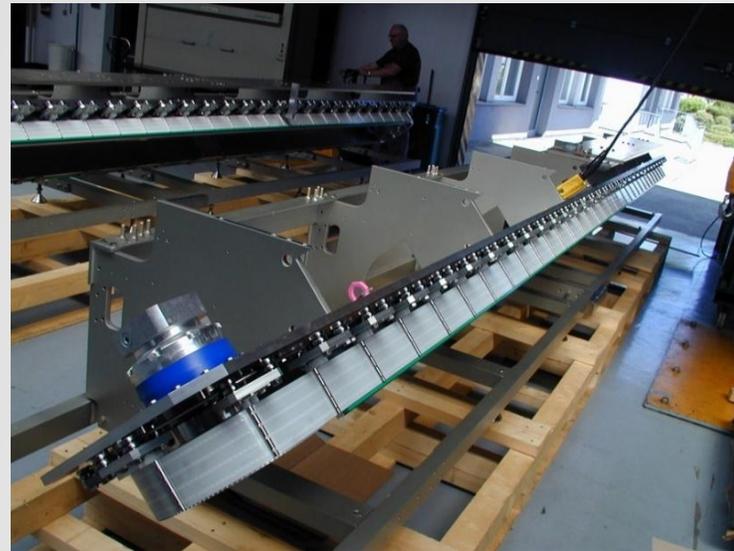

Extrusion technology

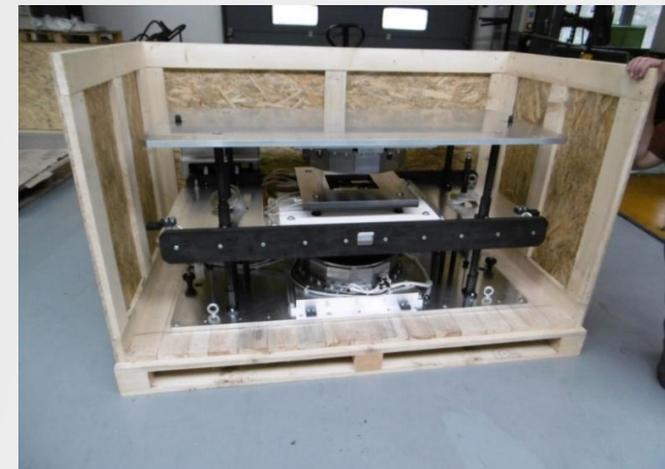

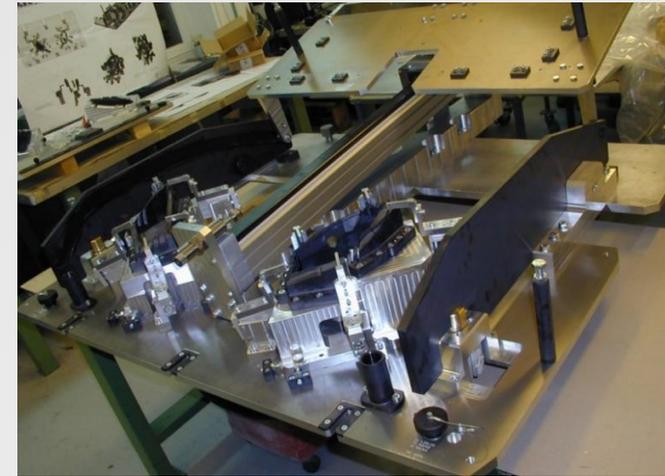

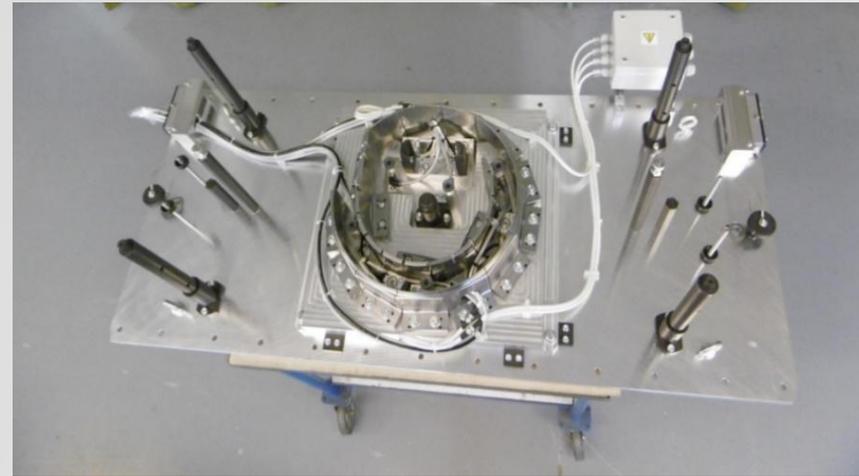

Cable production

Packaging machines

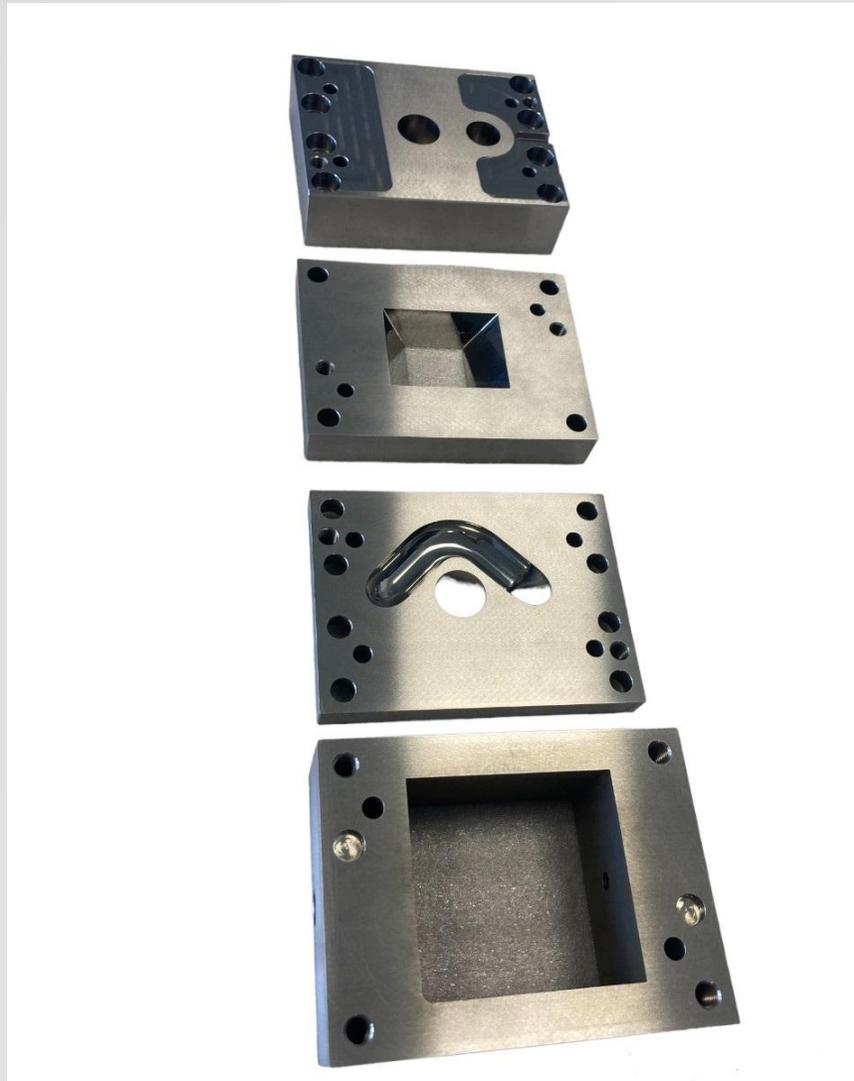

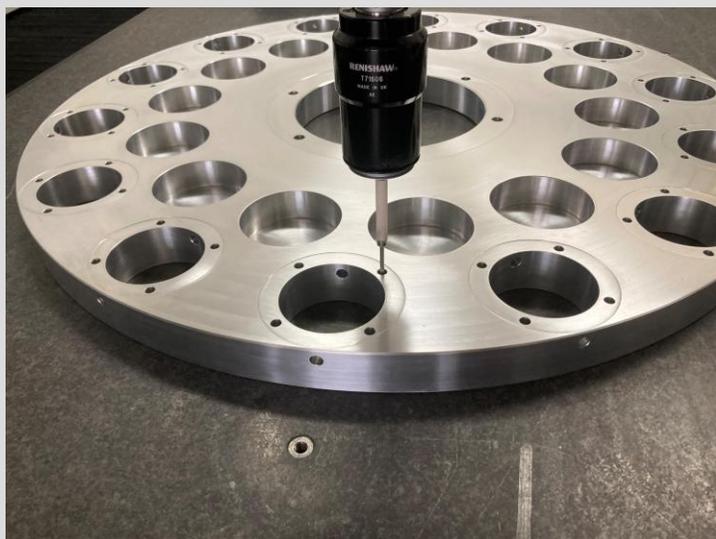

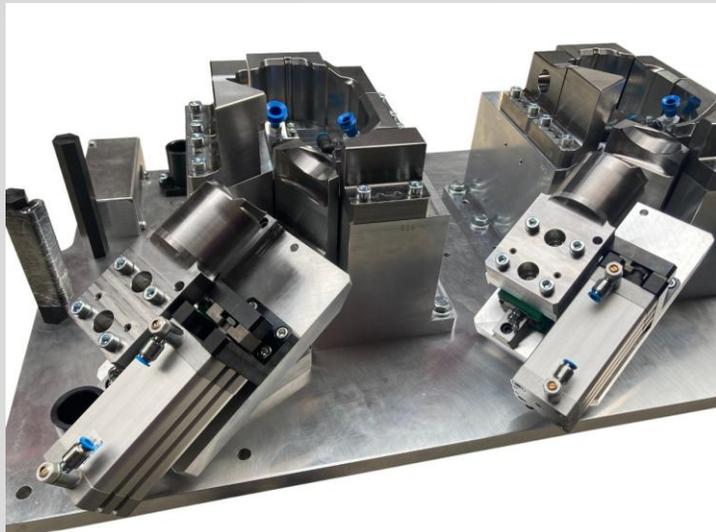

Plastic joining
