ELKOND HHK

Our cables lead to you

ELKOND
fabrika káblů

More than 30 years

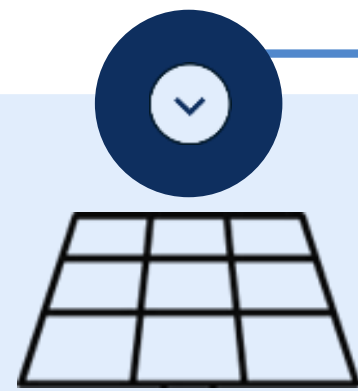

We are a leading Slovak manufacturer of cables with requirements for fire safety and for applications in the field of telecommunications, data transmission and security technology.

For more than 30 years, we have been producing cables and wires for our customers in our own premises with a fully equipped infrastructure in Trstena in the north of Slovakia. The main logistics center is located in Hronsek near Banská Bystrica.

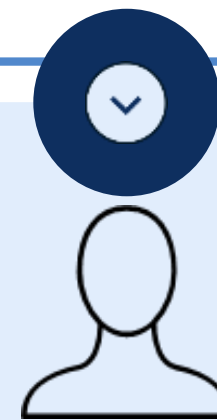

We are stable partner

17 000 m2

Factory area

120

Employees

ISO 9001 and 14001

Certificates

Development ELKOND HHK

Production start of telecom cables

1993

1998

Company transformation to ELKOND HHK, a.s.

Creation of a sales department in Hronsek

2001

2002

Start of production of HFFR cables

ELKOND HHK 100% Slovak ownership

2014

2017

Extension of warehouse capacity in Hronsek

New production hall and new production line

2018

2019

2020

2021

Modernization of production lines

Construction of photovoltaic power plant in Trstená

2023

2024

New warehouse and administrative building
in Hronsek

Company history

Production of telecom, control, signal, installation and data cables

1994

Telecom cables with SwFLE components protected by utility model 4529

1996

EN ISO 9001 and EN ISO 14001 management system certification

2002

Conductors for electrical detonators

2002

Cables with fire protection parameters

2004

2008

Certification of cables with fire parameters acc. to LAW Nr. 90/1998 - construct. products

2011

EFK Solar, EFK Solar-80 and telecom cables with rodent protection

2017

Production and sale of cables with CPR classification according to EN 50575

Start of production of cables with braided screening and PTTA cables

2018

2020

Start of production of BUS cables for KNX systems

Charging high-power/fast charging/ cables for electric cars

2021

Production possibilities

Control cables

They are used to provide a signal for sensors, sensors and other automation.

Copper wires and ropes

They are used for joining, interconnecting and manufacturing products where it is necessary or appropriate to use uninsulated copper.

Communication cables

They are intended for the transmission of data and telecommunication signals.

Power cables

They are used to supply electricity.

Power cables with reaction to fire B2ca

They are intended for the supply of electricity in reserved fire areas

Special products

We produce them based on the requirements of our customers.

Control cables with reaction to fire

They are used to ensure the signal for sensors, detectors and other automation in dedicated fire sections.

Production possibilities

Hybrid cables

A combination of different types
conductors in one cable

Special cables

Conductors for pyrotechnics
XCE, XCE-H, XCYL, XCYS, XPYS
Cu and FeCu conductors 0.5 to 0.8 mm

UV stable
flexible at temperatures up to -
40°C, resistant to oils

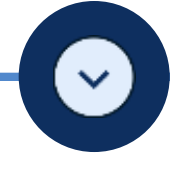

Cables with protection against
rodents
with superabsorbers

Cables with steel supporting
rope

Where our cables lead?

Energetic sector

Pyrotechnic industry

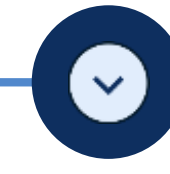

End costumers

Motorways and expressways

Telecommunications operators

Development projects

Membership in professional organizations

SINCE
2006

founder member
ASSOCIATION OF PASSIVE FIRE
PROTECTION

SINCE
2009

active member
ASSOCIATION OF CABLE
PRODUCERS

Quality management

We emphasize quality and ecology. All products of ELKOND HHK, a.s. they comply with the RoHS directive and the provisions of the REACH regulation.

Where are we heading?

**Continual improvement of communication and services
to our clients**

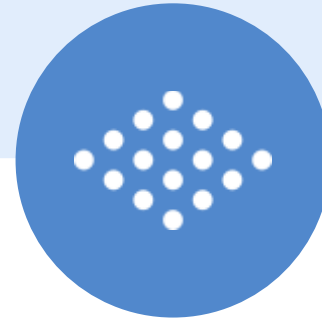

**Complex solutions in the area of development and
production of special cables**

Increase of export to surrounding countries

THANK YOU FOR
YOUR ATTENTION
