At CIPI s.r.o., based in Ružomberok, we specialise in the production of thin-walled bent profiles, offering a wide range of services tailored to the needs of our business partners and customers, using state-of-the-art machinery.

Our core product range includes thin-walled profiles with U, L, C, G and Omega cross sections, as well as perforated metal sheets (holes, grooves, dents) up to 3 mm in thickness. Production lengths range from 4.300 mm up to 8.000 mm for selected elements.

Complete profile production in various shapes, sizes and forms:

- Roof elements – Z profiles, U profiles, G profiles, omegas, edges and more
- Façade elements – edges and a variety of sheet metal finishes
- Custom-made non-standard profiles tailored to your specifications
- Complete portfolio of accessories for roof rims, such as corner braces
- Connecting elements, cross-braces, pull bars and anchors
- CNC-produced shaped metals, cut or laser-cut
- Coating in any RAL colour
- Flexible delivery schedules

Thanks to our enhanced production capabilities, we are able to offer the following services:

- CNC material sorting – laser, plasma/acetylene
- CNC cutting and punching
- Bending
- Unwinding and sorting of sheet metal rolls
- Metal cutting
- Welding of iron and aluminium, riveting and finishing of components
- Oversized powder coating 8.500 × 2.500 × 900
