

Plectrum engineering

We tune your business to the right rhythm
with **cloud & DevOps** solutions

[Explore our services](#) →

Reliable Infrastructure Without Limits

We analyze, design, and fine-tune solutions so your cloud runs reliably, efficiently, and sustainably using modern DevOps practices

Designed around your needs

Understanding your needs and designing a long-term, tailor-made solution is essential for us.

From startups to enterprises

We adapt to your pace – whether you're launching your MVP or modernizing a large infrastructure.

Across every industry

From FinTech to MedTech and everything in between, we work wherever reliability and precision matter.

When Companies Call Us

Typical situations where we step in.

Core Services

What we deliver for you end-to-end.

Design of a infrastructure that grows with your business

- Cloud-native architecture design
- Environment standardization
- CI/CD process design and automation
- Security and compliance baseline
- Platform and workflow design

Optimizing your cloud so your investment actually pays off

- FinOps analysis and cost optimization
- Reducing resource waste
- CI/CD pipeline acceleration
- Reliability improvements (SLOs, SLAs, incidents)
- Eliminating infrastructure technical debt

Training and enablement for self-sufficient Cloud and DevOps teams

- Practical cloud training (AWS, Azure, and more)
- Hands-on DevOps and Kubernetes workshops
- FinOps, reliability, and observability training
- Delivered directly in your environment

Building production-ready infrastructure from day one

End-to-end DevOps delivery built on Infrastructure as Code

Custom CI/CD pipelines

Security, compliance, and SIEM integration

Container orchestration (e.g., Kubernetes, ECS, AKS)

Observability (logs, metrics, tracing)

High availability, networking, and secrets management

Industry-standard change, security, and patch management

Migration to the cloud with zero downtime and minimal risk

Cloud readiness assessment

Application, database, and service migration

Choosing the right strategy (rehost, refactor, rebuild)

Zero-downtime, low-risk migration

Infrastructure modernization using modern DevOps tooling

FinTech projects
Reliability, security, and regulatory compliance (since 2015)

Netherlands & Belgium

Switzerland

Government projects
Secure and regulation-compliant cloud architectures

USA

Start-up clients
Empowering startups from MVP to cloud-scale success

Singapore

Changi Airport
System architecture collaboration and solution design

FinTech Roots Global Impact

We've transformed our FinTech experience into a global approach to secure and scalable cloud solutions.

Certified Cloud Expertise

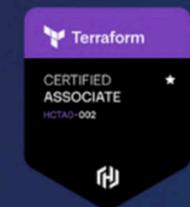

Powered by proven cloud platforms and in-house certified engineers. Quality you can trust.

kubernetes

Official AWS & Microsoft Solutions Partner

and more

Education & Mentoring

Built on real-world engineering experience.

500+

hours of teaching
delivered

400+

students taught

Mentoring program for junior engineers

Plectrum Incubator is our mentoring program for juniors who want to skyrocket their cloud and DevOps engineering skills.

Training based on professional experience

Our engineers have been teaching DevOps, platform, cloud and infrastructure since 2015 – from university courses to commercial training.

UNIVERSITY OF ŽILINA
Faculty of Management Science
and Informatics

UNIZA education partner since 2015

Every year we teach engineering students cloud technologies and modern infrastructure trends.

10+

years of experience

**Hands-on
expertise**

Projects led by
senior engineers without
unnecessary layers

**Security & FinOps
mindset**

Secure, auditable
and cost-effective solutions

Trusted

in regulated
environment

15+

certificates
obtained

**What Makes Us a
Good Partner**
