Dear Partners,

In a constantly changing market, securing a reliable manufacturing partner capable of offering a European-quality product at a fundamentally more competitive price is the key to leadership. Mlyn Invest s.r.o. offers you precisely this opportunity—a chance to redefine your procurement strategy and gain a decisive competitive advantage.

As part of a European holding with a quarter-century of experience in grain processing, we have engineered a unique business model. Our state-of-the-art production facility, certified to the highest IFS Food standard, is strategically located in the heart of Europe, in Slovakia. This, combined with direct access to a raw material base, enables us to produce premium-quality breadcrumbs and specialized coating mixes at a price point unattainable for most European producers. We do not compromise on quality—we optimize the supply chain, and we pass this financial benefit directly on to you.

Our products meet the strictest demands of the modern consumer, and our portfolio offers solutions for every need:

- The "Healthy Line" Range: Our answer to the growing demand for health-conscious products. These are eco-friendly breadcrumbs produced with a unique fat-free technology. This not only results in a lighter, healthier product for the end consumer but also provides a significant operational advantage for you—an extended shelf life of up to 12 months, simplifying logistics and inventory management.**
- The "Golden Vienna" Range: Our classic solution for achieving the perfect golden color and crispy texture in your culinary applications.**

All our products are certified to the V-Label (Vegan) standard, guaranteeing full compliance with the market's most rigorous requirements and opening the door for your vegan and vegetarian product ranges.

We understand the needs of large-scale businesses and are fully oriented towards the HoReCa, food production, and wholesale sectors. Our standard packaging—5 kg and 10 kg bags, as well as big-bags (up to 1 ton)—is optimized for your production and logistics processes. Furthermore, we have extensive experience in Private Label manufacturing and are prepared to develop and produce an exclusive product according to your precise technical specifications.

Our approach has already earned the trust of leading food market operators across Europe. We are now ready to become your strategic partner.

To build an effective and mutually beneficial partnership, we kindly request that you provide information regarding the procurement tender process within your company. This will allow us to prepare a customized proposal that we are confident will exceed your expectations in both price and quality. Samples of our products will be provided upon your first request.

Sincerely,

The Mlyn Invest s.r.o. Team
