Your Strategic Software Partner

We build modern enterprise systems that power the industry

Helping clients operate smarter, scale faster, and modernize with confidence.

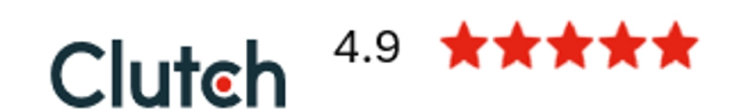

We **specialize in building complex, scalable enterprise platforms**—from backend architecture to frontend design—delivering seamless cross-departmental workflows.

We **modernize legacy systems with zero disruption**, transforming outdated technologies into cloud-ready, future-proof solutions.

We bring **14+ years of deep experience** in building enterprise-grade systems for regulated industries, with expertise in compliance, operations, and mission-critical workflows.

We **deliver tightly integrated solutions that work with your existing financial** systems like SAP, Navision, and legacy ERP platforms.

We **support the entire lifecycle of custom enterprise systems**: from design to delivery, QA to rollout, and long-term support—using agile, collaborative methods tailored to your pace.

WHAT WE DELIVER

Full-Cycles

Full-cycle Agile Custom Software Development

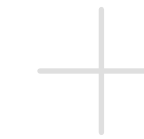

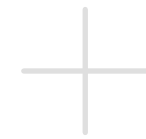

Zero-Downtime

Zero-downtime modernization of legacy systems into cloud-ready, future-proof solutions

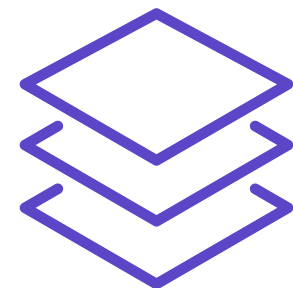

Design & Delivery

Design and delivery of scalable, enterprise-grade platforms

14+ Years

14+ years of expertise in enterprise integration, compliance-driven systems, and operational transformation

Seamless Integration

Seamless integration of cross-functional workflows

ERP Integrations

Modular ERP integration, with deep experience in SAP, Dynamics, Navision, Oracle, and more

OUR SERVICES

Core Development

- Enterprise Applications
- Legacy Modernization
- SaaS Applications
- Product Development

Testing & QA

- Manual Testing
- Regression
- Performance
- Multi-Platform
- UI Testing

Analytics & BI

- BI Consulting
- BI Support & Evolution
- BI Implementation

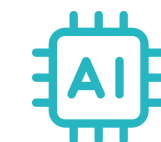

Mobility

- iOS
- Android
- Cross-Platform
- Progressive Web Apps

User Experience

- UI Design
- UX Audit
- Research & Testing

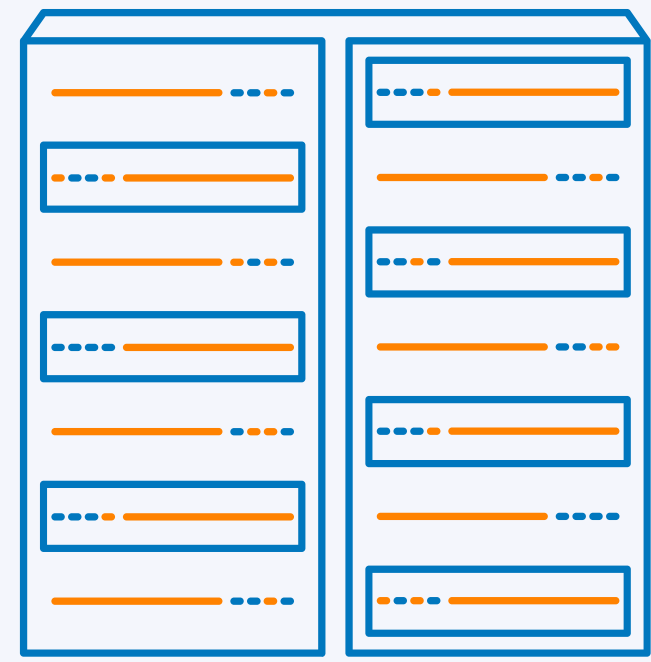

Emerging Tech

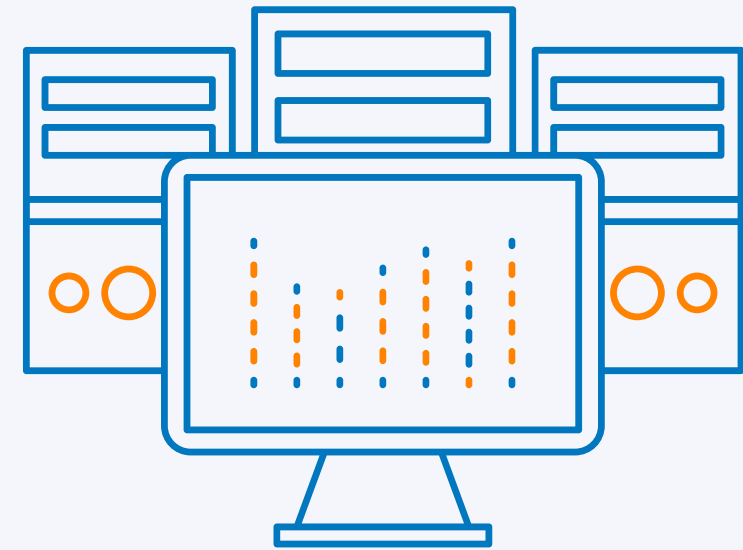

- AI Integrations
- AI Consulting
- Scalable Deployments

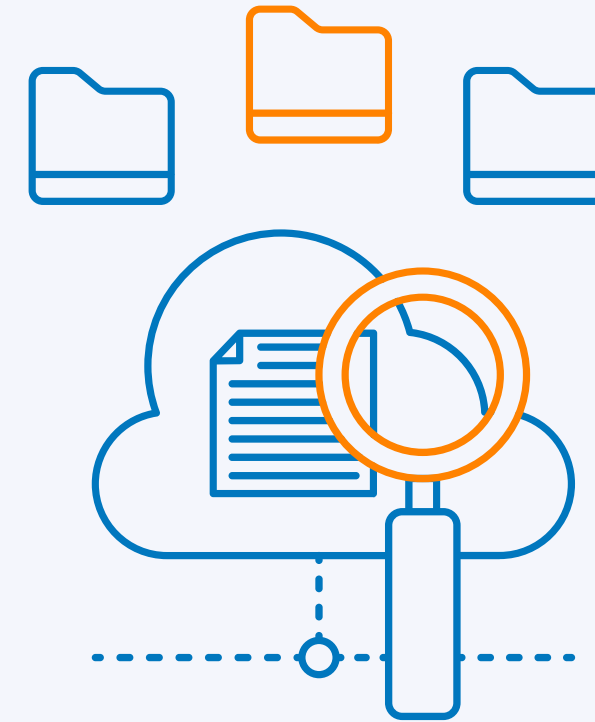

OUR INDUSTRY EXPERTISE

CYBERSECURITY & COMPLIANCE BY DESIGN

At Rare Crew, security is not an afterthought — it's embedded into the architecture of every system we build. We provide end-to-end cybersecurity support and governance that aligns with regulated and high-security industries.

ISO 27001 & Cyber Essentials certified solutions

CI/CD pipeline hardening and secure DevOps support

GDPR and defense-sector compliance integration

Cybersecurity audits, technical risk assessments, and governance reviews

Digital forensics and incident readiness advisory

Internal application vulnerability scanning & reporting

SECURE BUSINESS SYSTEMS & INFRASTRUCTURE

We help organizations digitize their operations while maintaining **complete security, traceability, and compliance** across mission-critical workflows.

Enterprise-grade ERP and workflow systems

Role-based access, electronic approvals, and document controls

Integrations with Microsoft, Oracle, SAP, and other secure stacks

Vendor and contract lifecycle management with audit trails

Infrastructure monitoring and alerting solutions

Web, mobile, and cloud systems designed explicitly for defense-grade use

OUR EXPERTISE

Manufacturing & Operations

-  Production management
-  Facility & safety management
-  Lifecycle tracking
-  Order fulfillment

Workflow & Approvals

-  CRM
-  Support ops
-  Digital signatures
-  Audit trails
-  Change management

Compliance & Partner Relations

-  Regulatory tracking
-  Taxation
-  Vendor qualification
-  Contracting

Digital, Data & Content Systems

-  Websites
-  Portals
-  Documentation
-  Supply chain analytics
-  Governance

TECHNOLOGIES

BACKEND DEVELOPMENT

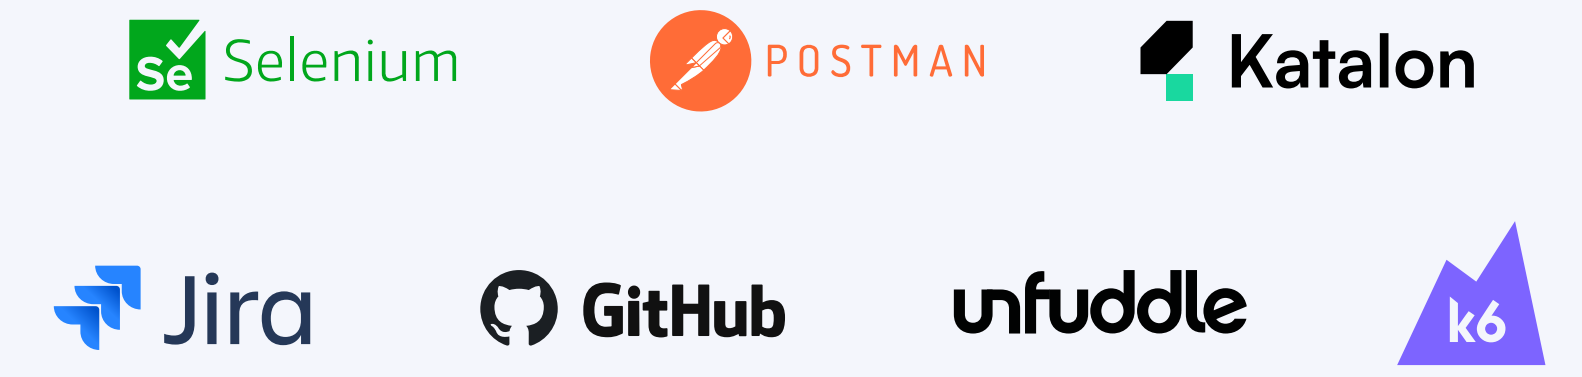

CLOUD & INFRASTRUCTURE

DEFENSE-GRADE INTEGRATIONS
WITH SAP, ORACLE, MICROSOFT

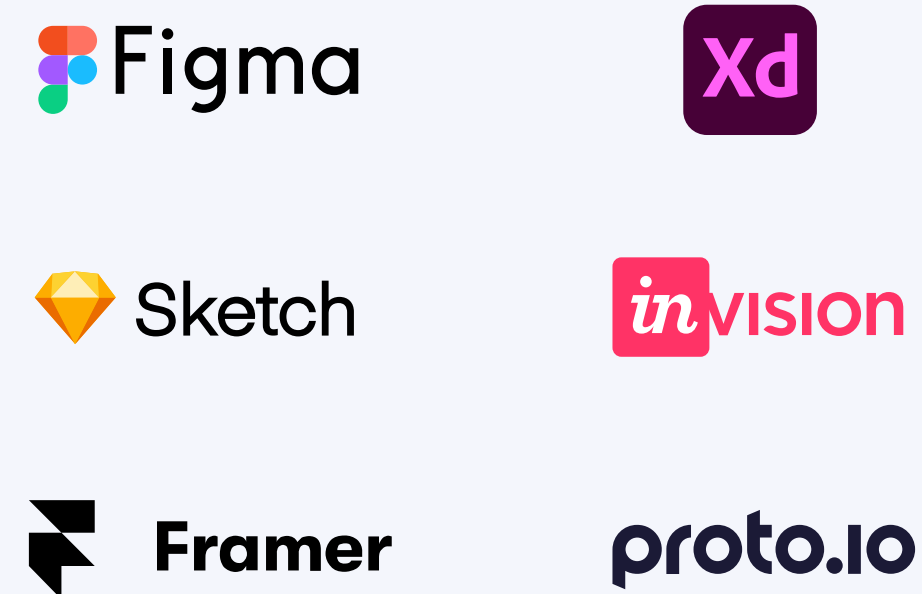

SOFTWARE TESTING & QA

FRONTEND DEVELOPMENT

UI/UX DESIGN & PROTOTYPING

DATA, CHARTS & VISUAL COMPONENTS

AI & AUTOMATION

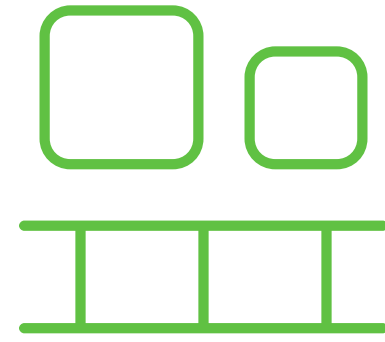

OUR PROCESS

Discovery & Planning

- Define goals
- KPIs
- Audit existing systems

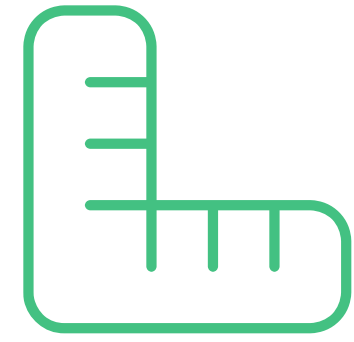

01

UX & Architecture

- User flows
- Wireframes
- Accessibility
- Stakeholder feedback

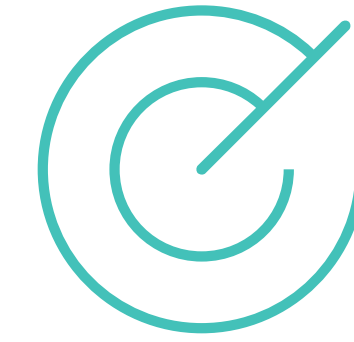

02

UI Design & Systemization

- High-fidelity designs
- Design system
- Developer handoff

03

Agile Development & Testing

- CI/CD pipelines
- Secure code reviews
- Automated testing

04

Launch & Continuous Improvement

- UAT
- Monitoring
- Optimization
- Incident readiness

05

Contact us to explore secure digital solutions for defense and mission-critical operations.
