Uniplast MH s.r.o.

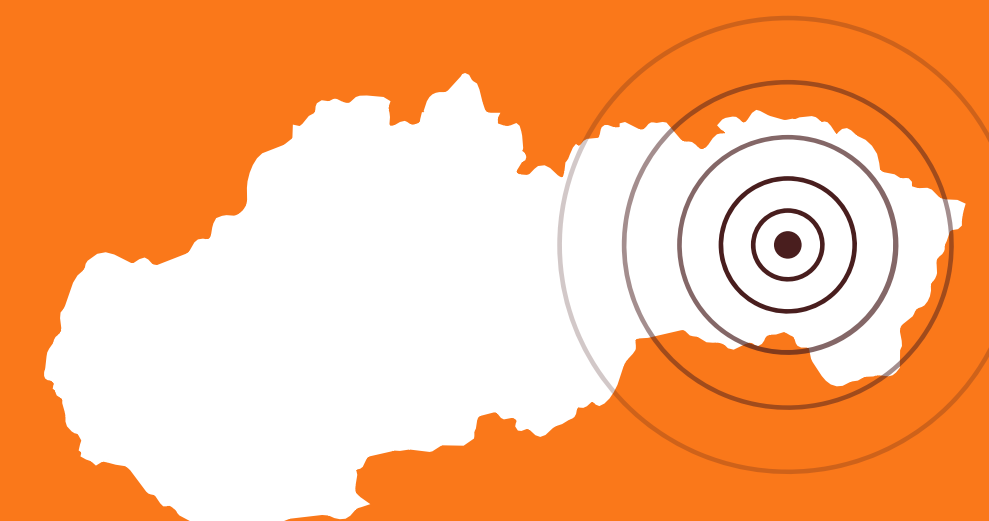

Company
presentation

About us

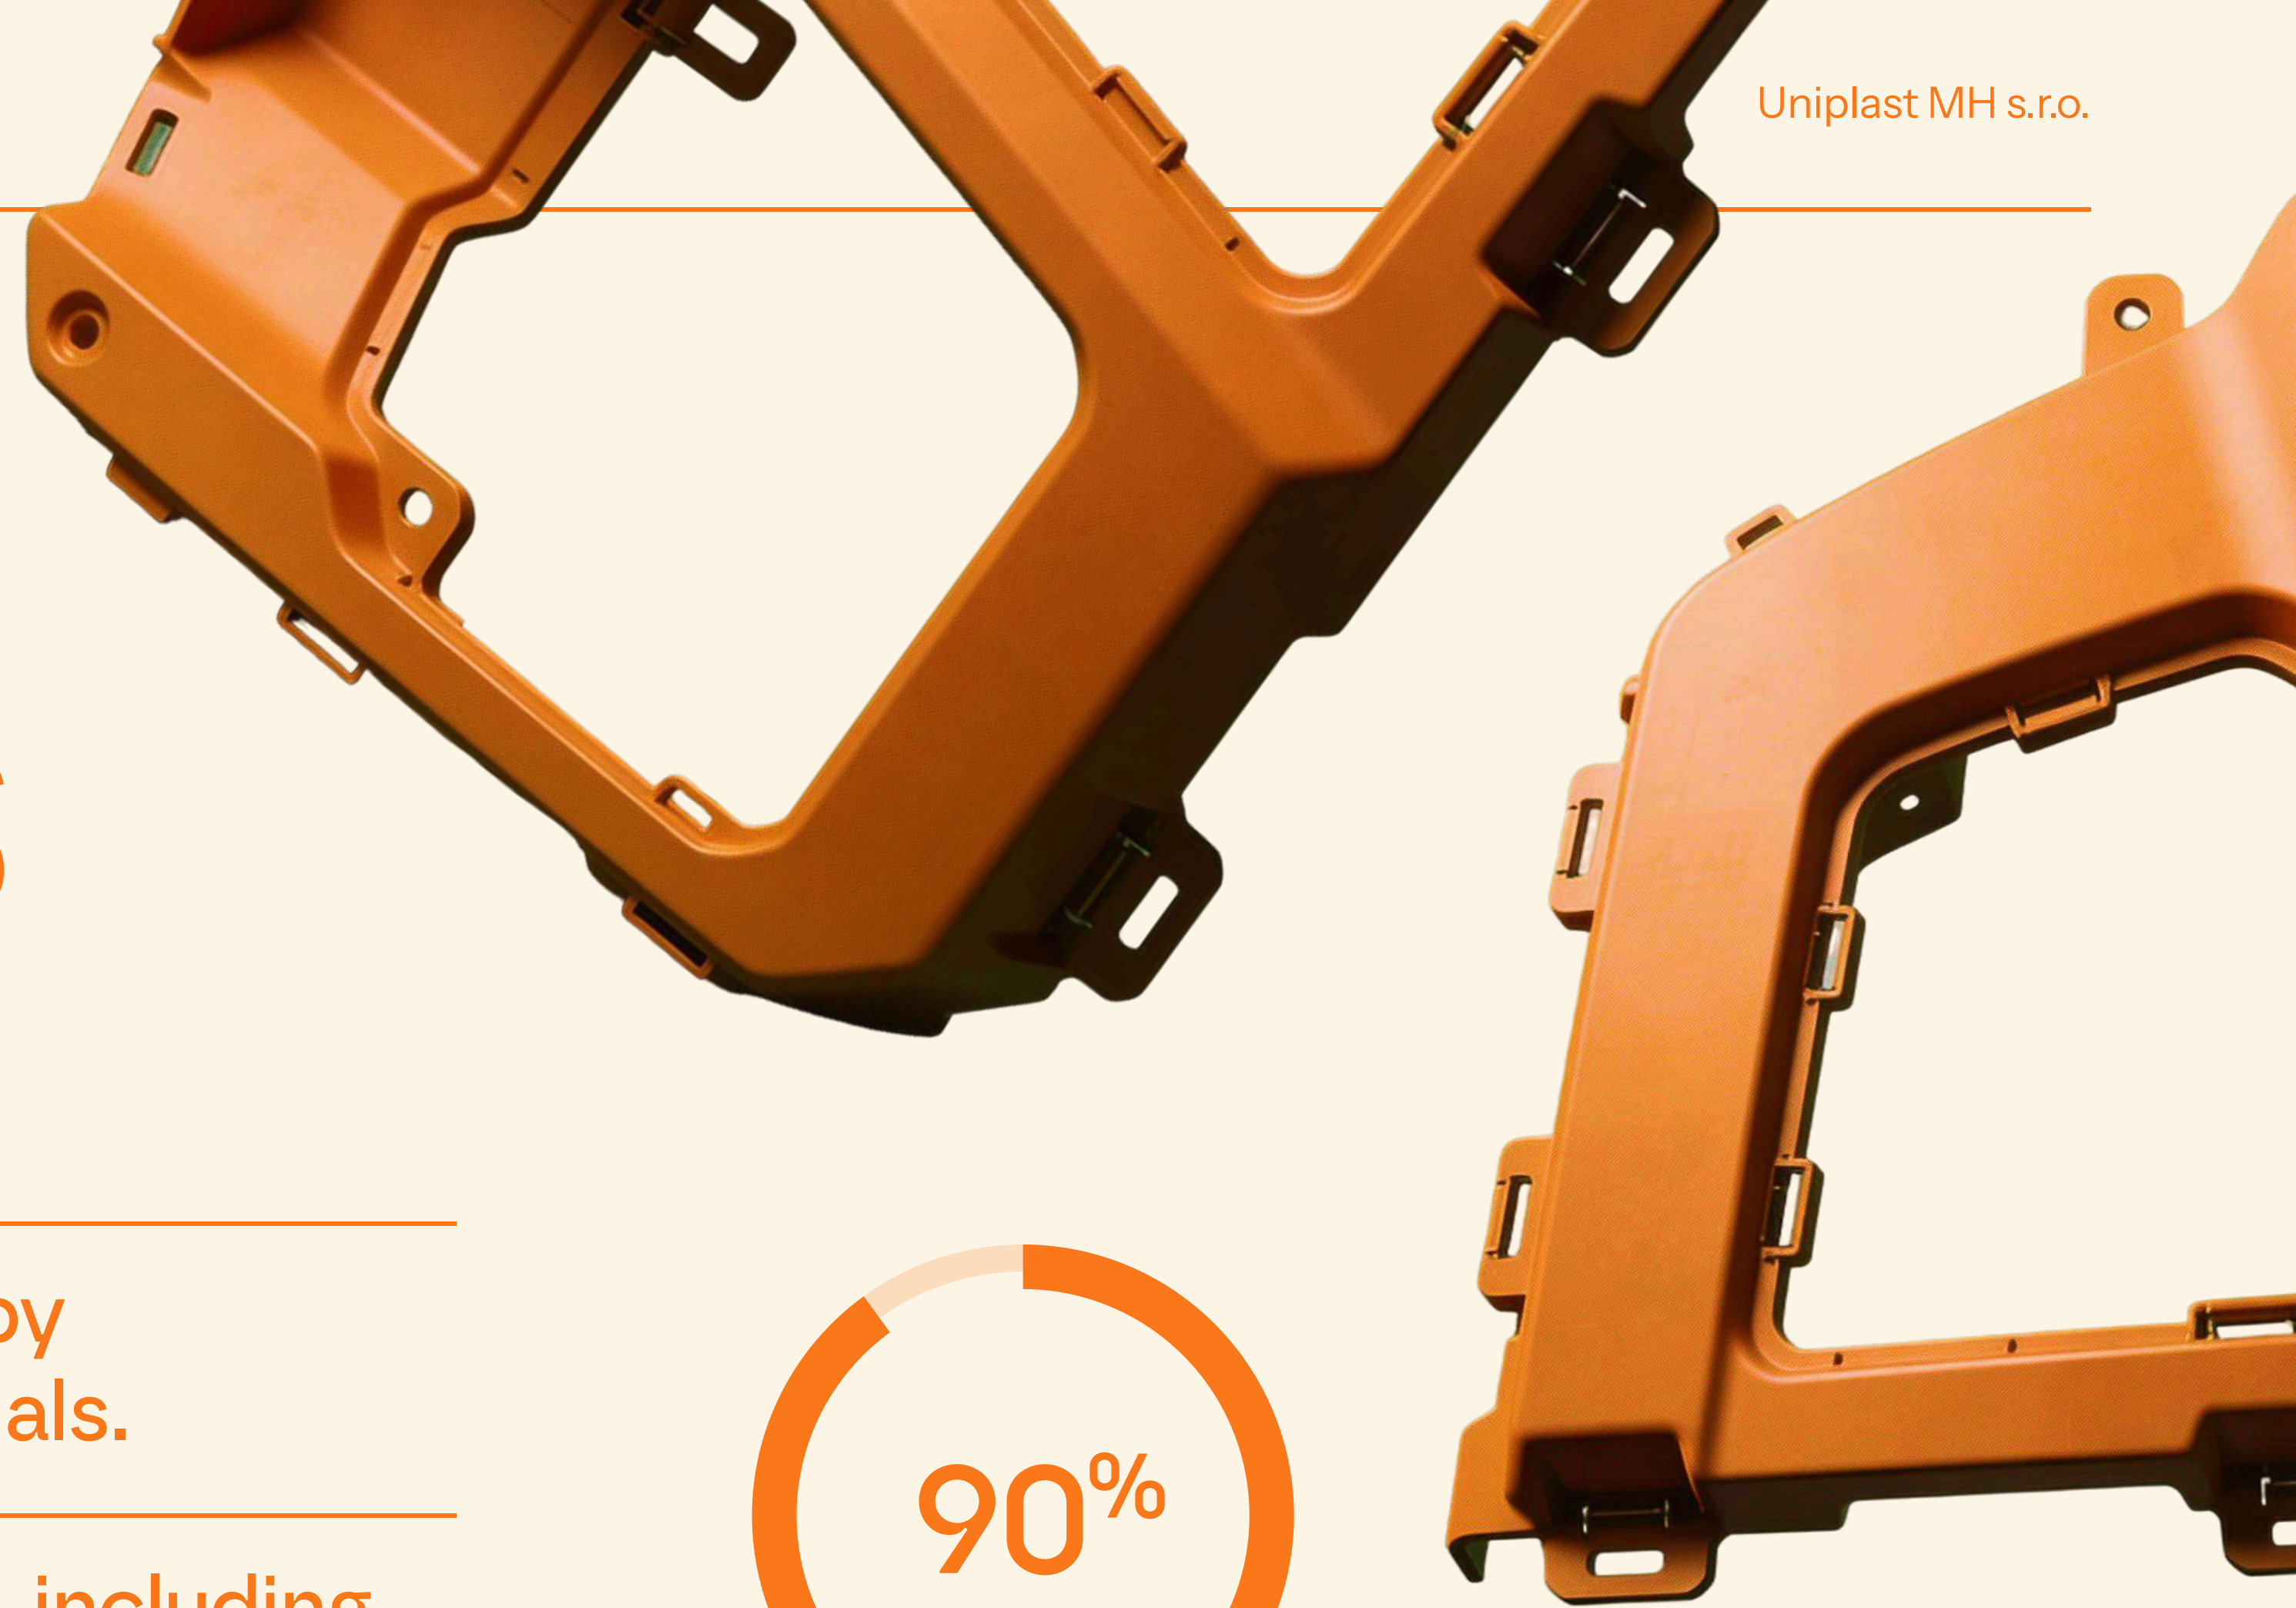

UNIPLAST MH s.r.o., based in Vranov nad Topľou, has been a stable partner in the field of plastic injection molding since its establishment in 2004.

With more than two decades of professional experience, we specialize in the production of technically demanding and aesthetic moldings for key segments such as the automotive industry, white goods, and construction.

UNIPLAST MH s.r.o.
Herlanská 547
093 03 Vranov n.T.

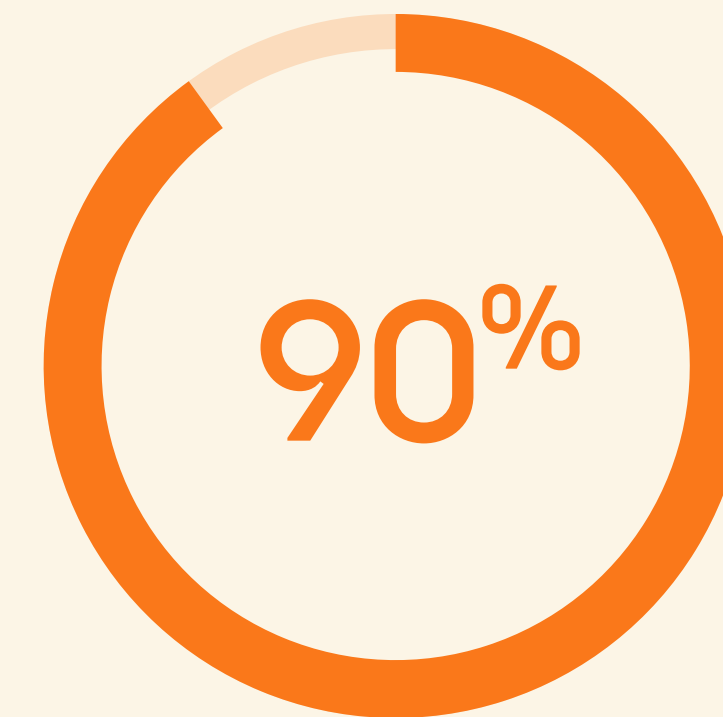

Main activities

01 Manufacture of plastic products by injection molding of plastic materials.

02 Assembly of system components, including our plastic parts

03 Rental of premises

The main activity is the manufacture and assembly of plastic products, which accounts for approximately 90% of turnover.

Company premises

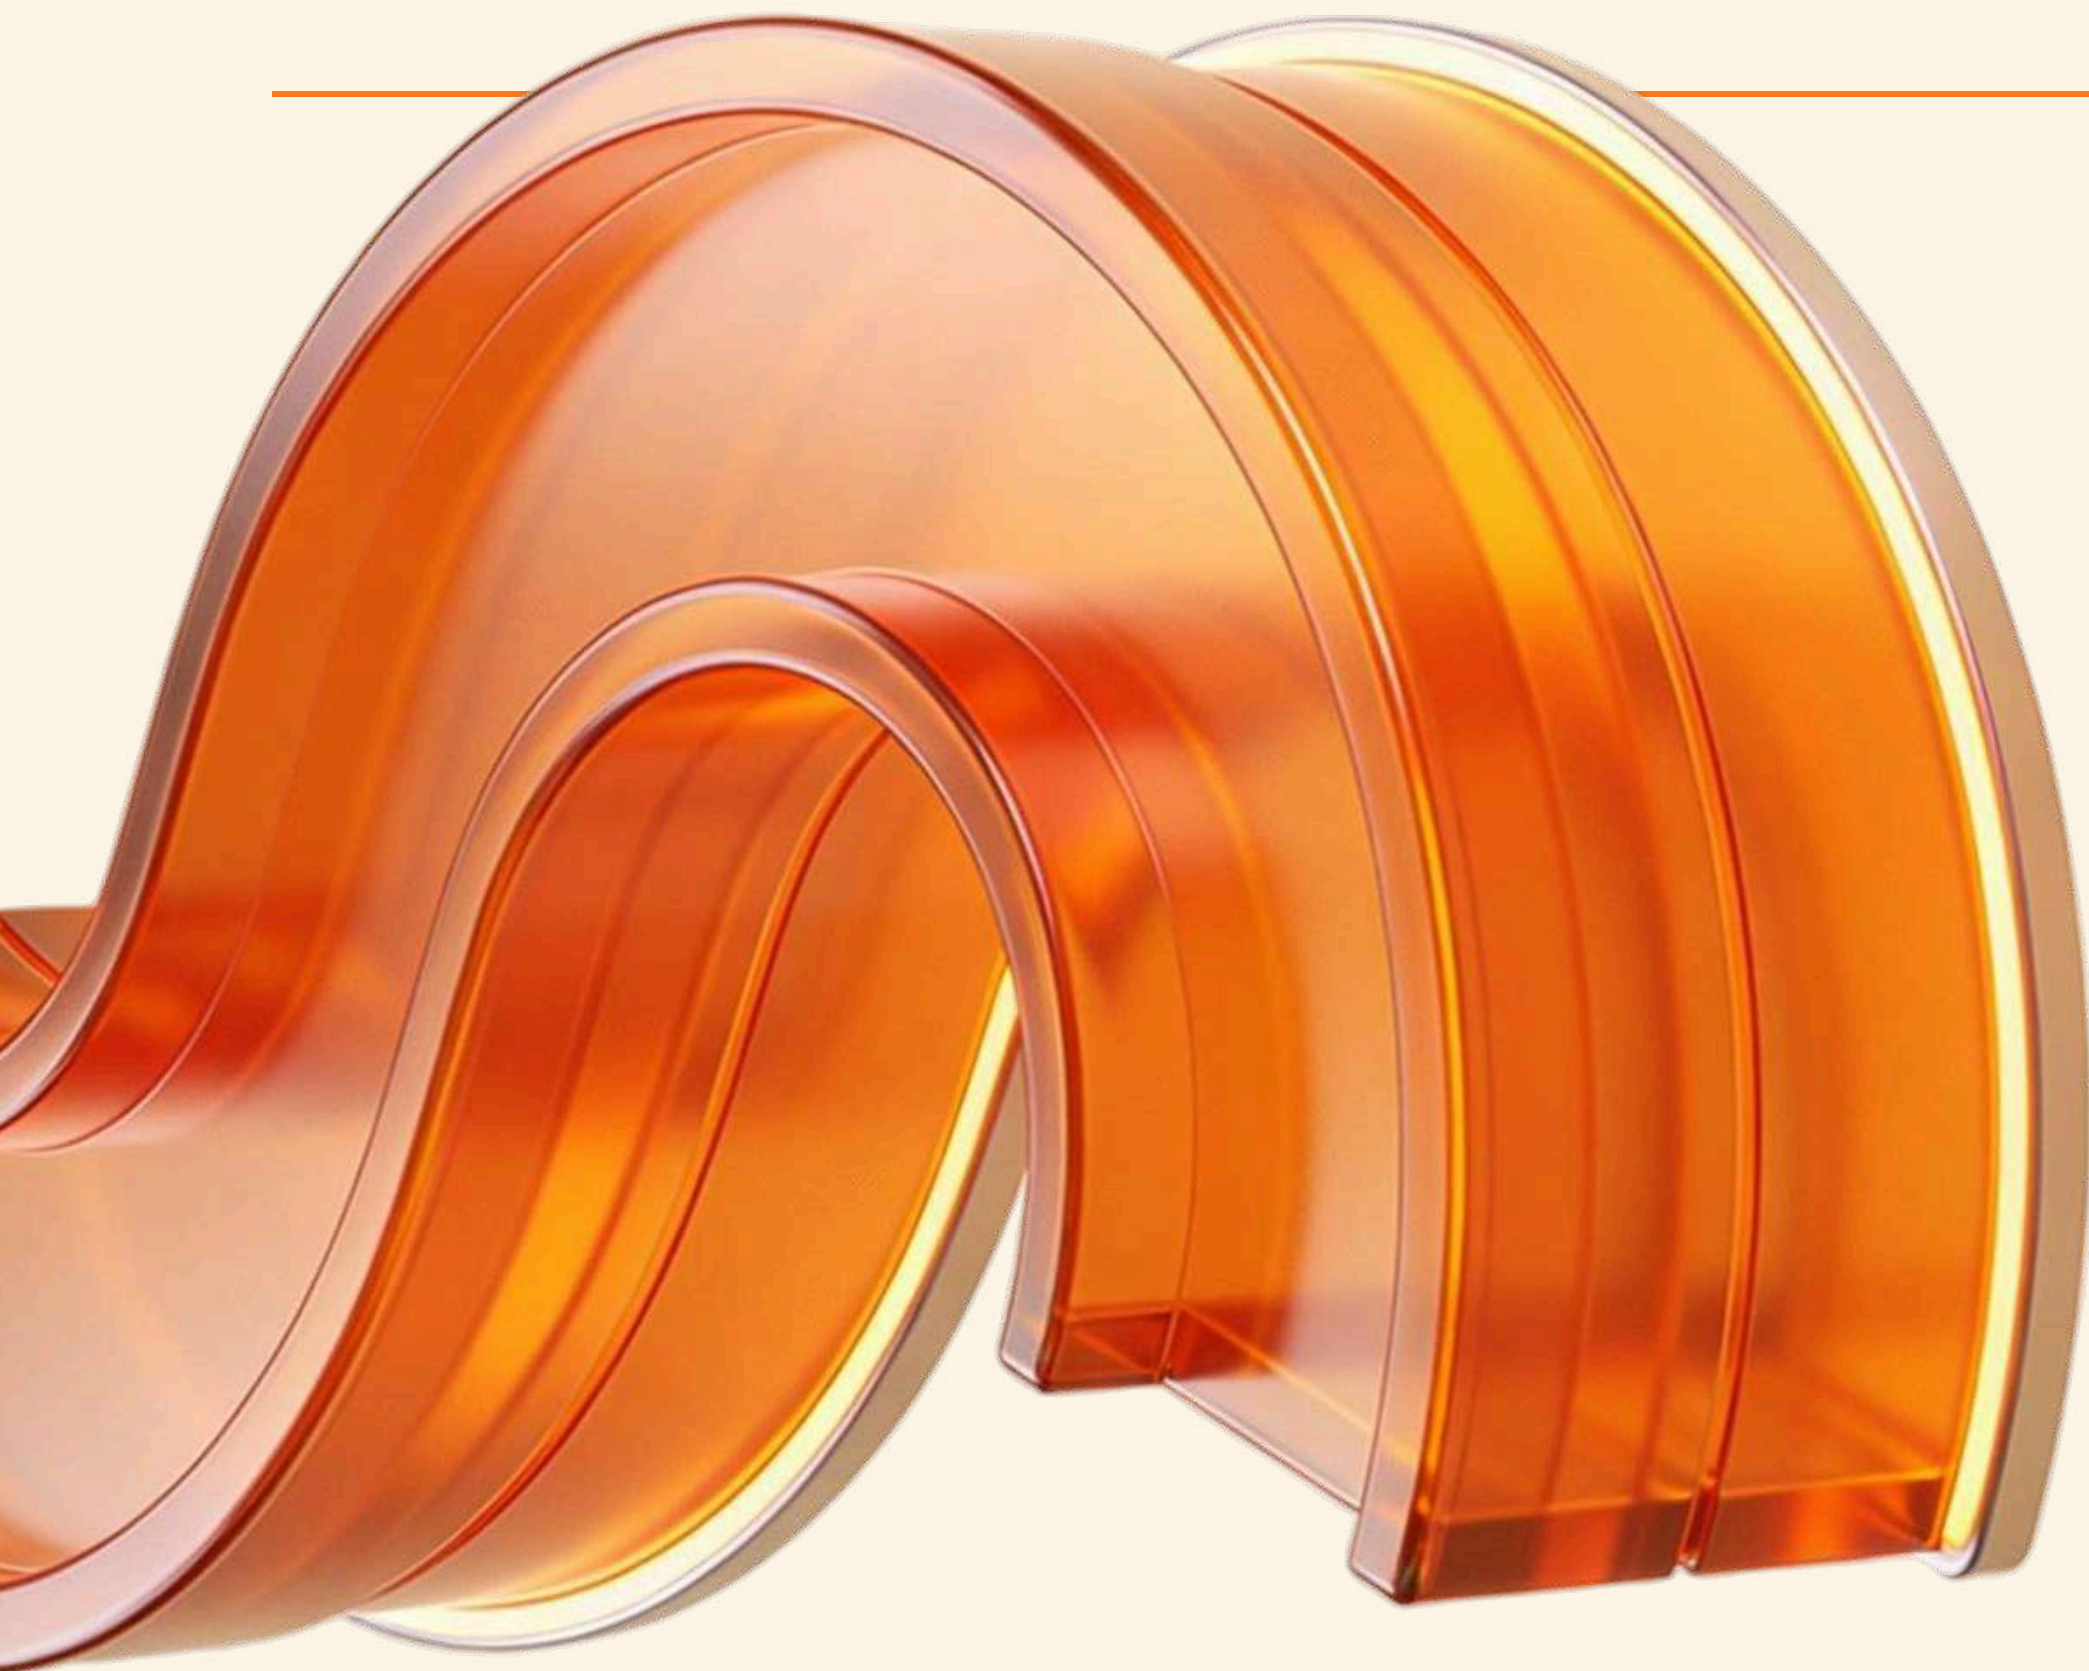

Production space **5 000 m²**

Rented space **6 000 m²**

Free space **3 000 m²**

Total area:

16 500 m²

Quality management

ISO 9001:2015
IATF 16949:2016
ISO 14001

Quality strategy and vision:

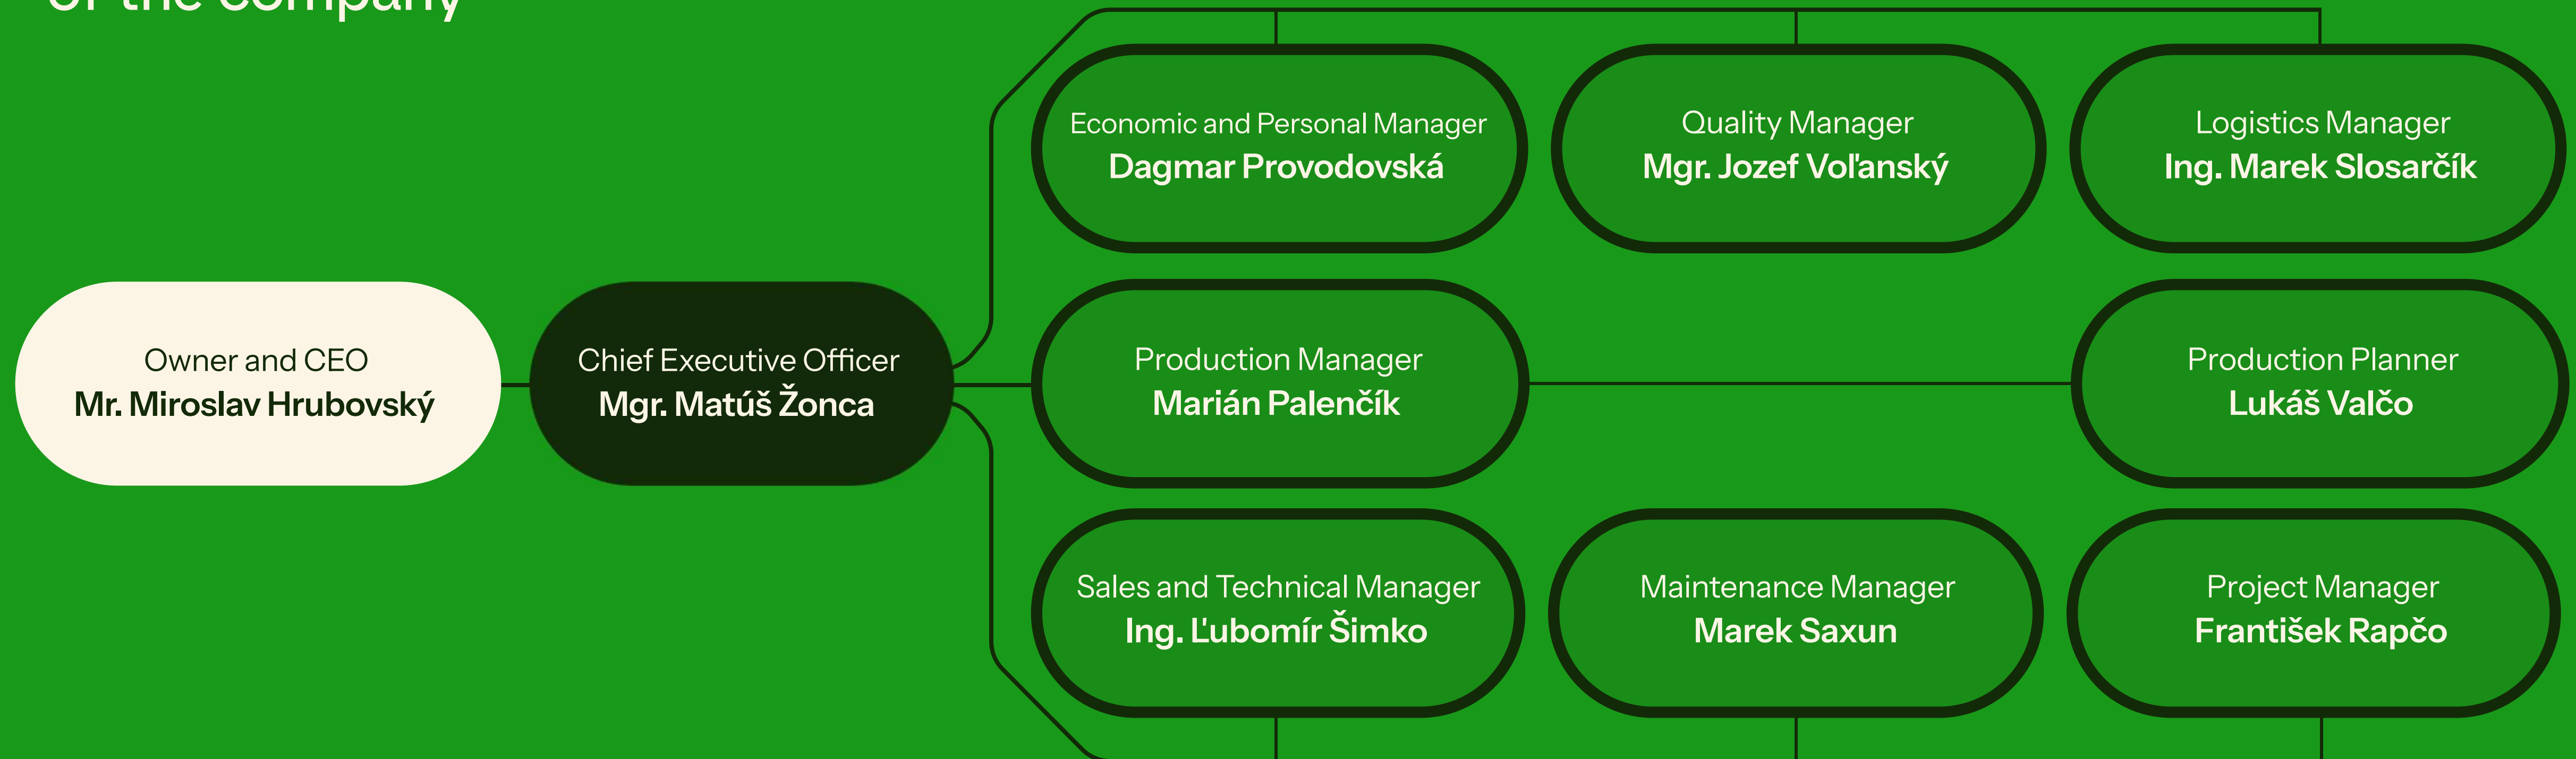

- 01 Dynamically develop in the field of plastic injection molding
- 02 To be a loyal and trustworthy partner for clients and suppliers
- 03 Offer high-quality products and services

Quality policy:

- 01 Customer satisfaction
- 02 Improvement of all activities
- 03 Employee training

Organizational structure of the company

Management

Technical equipment

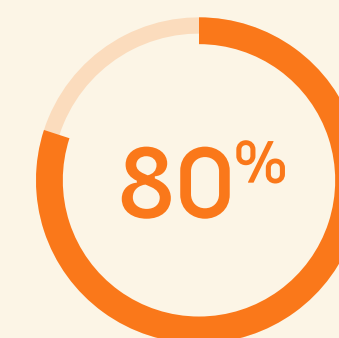

Production and technical facilities of the company

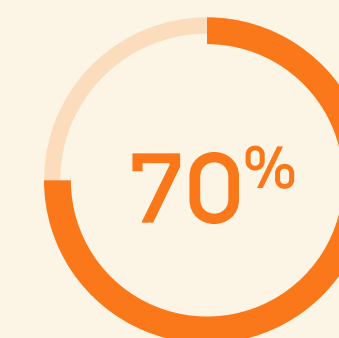

All machines are equipped with standard peripheral devices (raw material dryers, vacuum conveyors, mold tempering, etc.).

95% machines have robotic systems

80% machines are electric

70% energy savings, minimal noise, and maximum precision

Machines

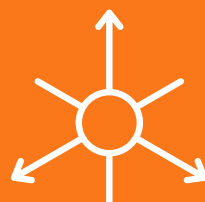

Model	Clamping pressure (t)	Model year	Quantity	Type
Mitsubishi 50	50	2006	4	Electric
Mitsubishi 100	100	2007	4	Electric
Mitsubishi 130, Zhafir 120	130	2007	2	Electric
Mitsubishi 180	180	2007	2	Electric
Mitsubishi 230	230	2007	2	Electric
Mitsubishi 280	280	2004	1	Electric
Haitian, Zhafir 120	300	2006	2	Hydraulic, Electric
Zhafir 90	90	2011	1	Electric
Zhafir 150	150	2011	1	Electric
Zhafir 230	230	2011/2017	3	Electric

L45 Engel e-victory 1065/220	220	2025	1	Hydraulic
L44 Engel e-victory 1340/300	300	2025	1	Hydraulic

Total machines:

31

Automatic workstations

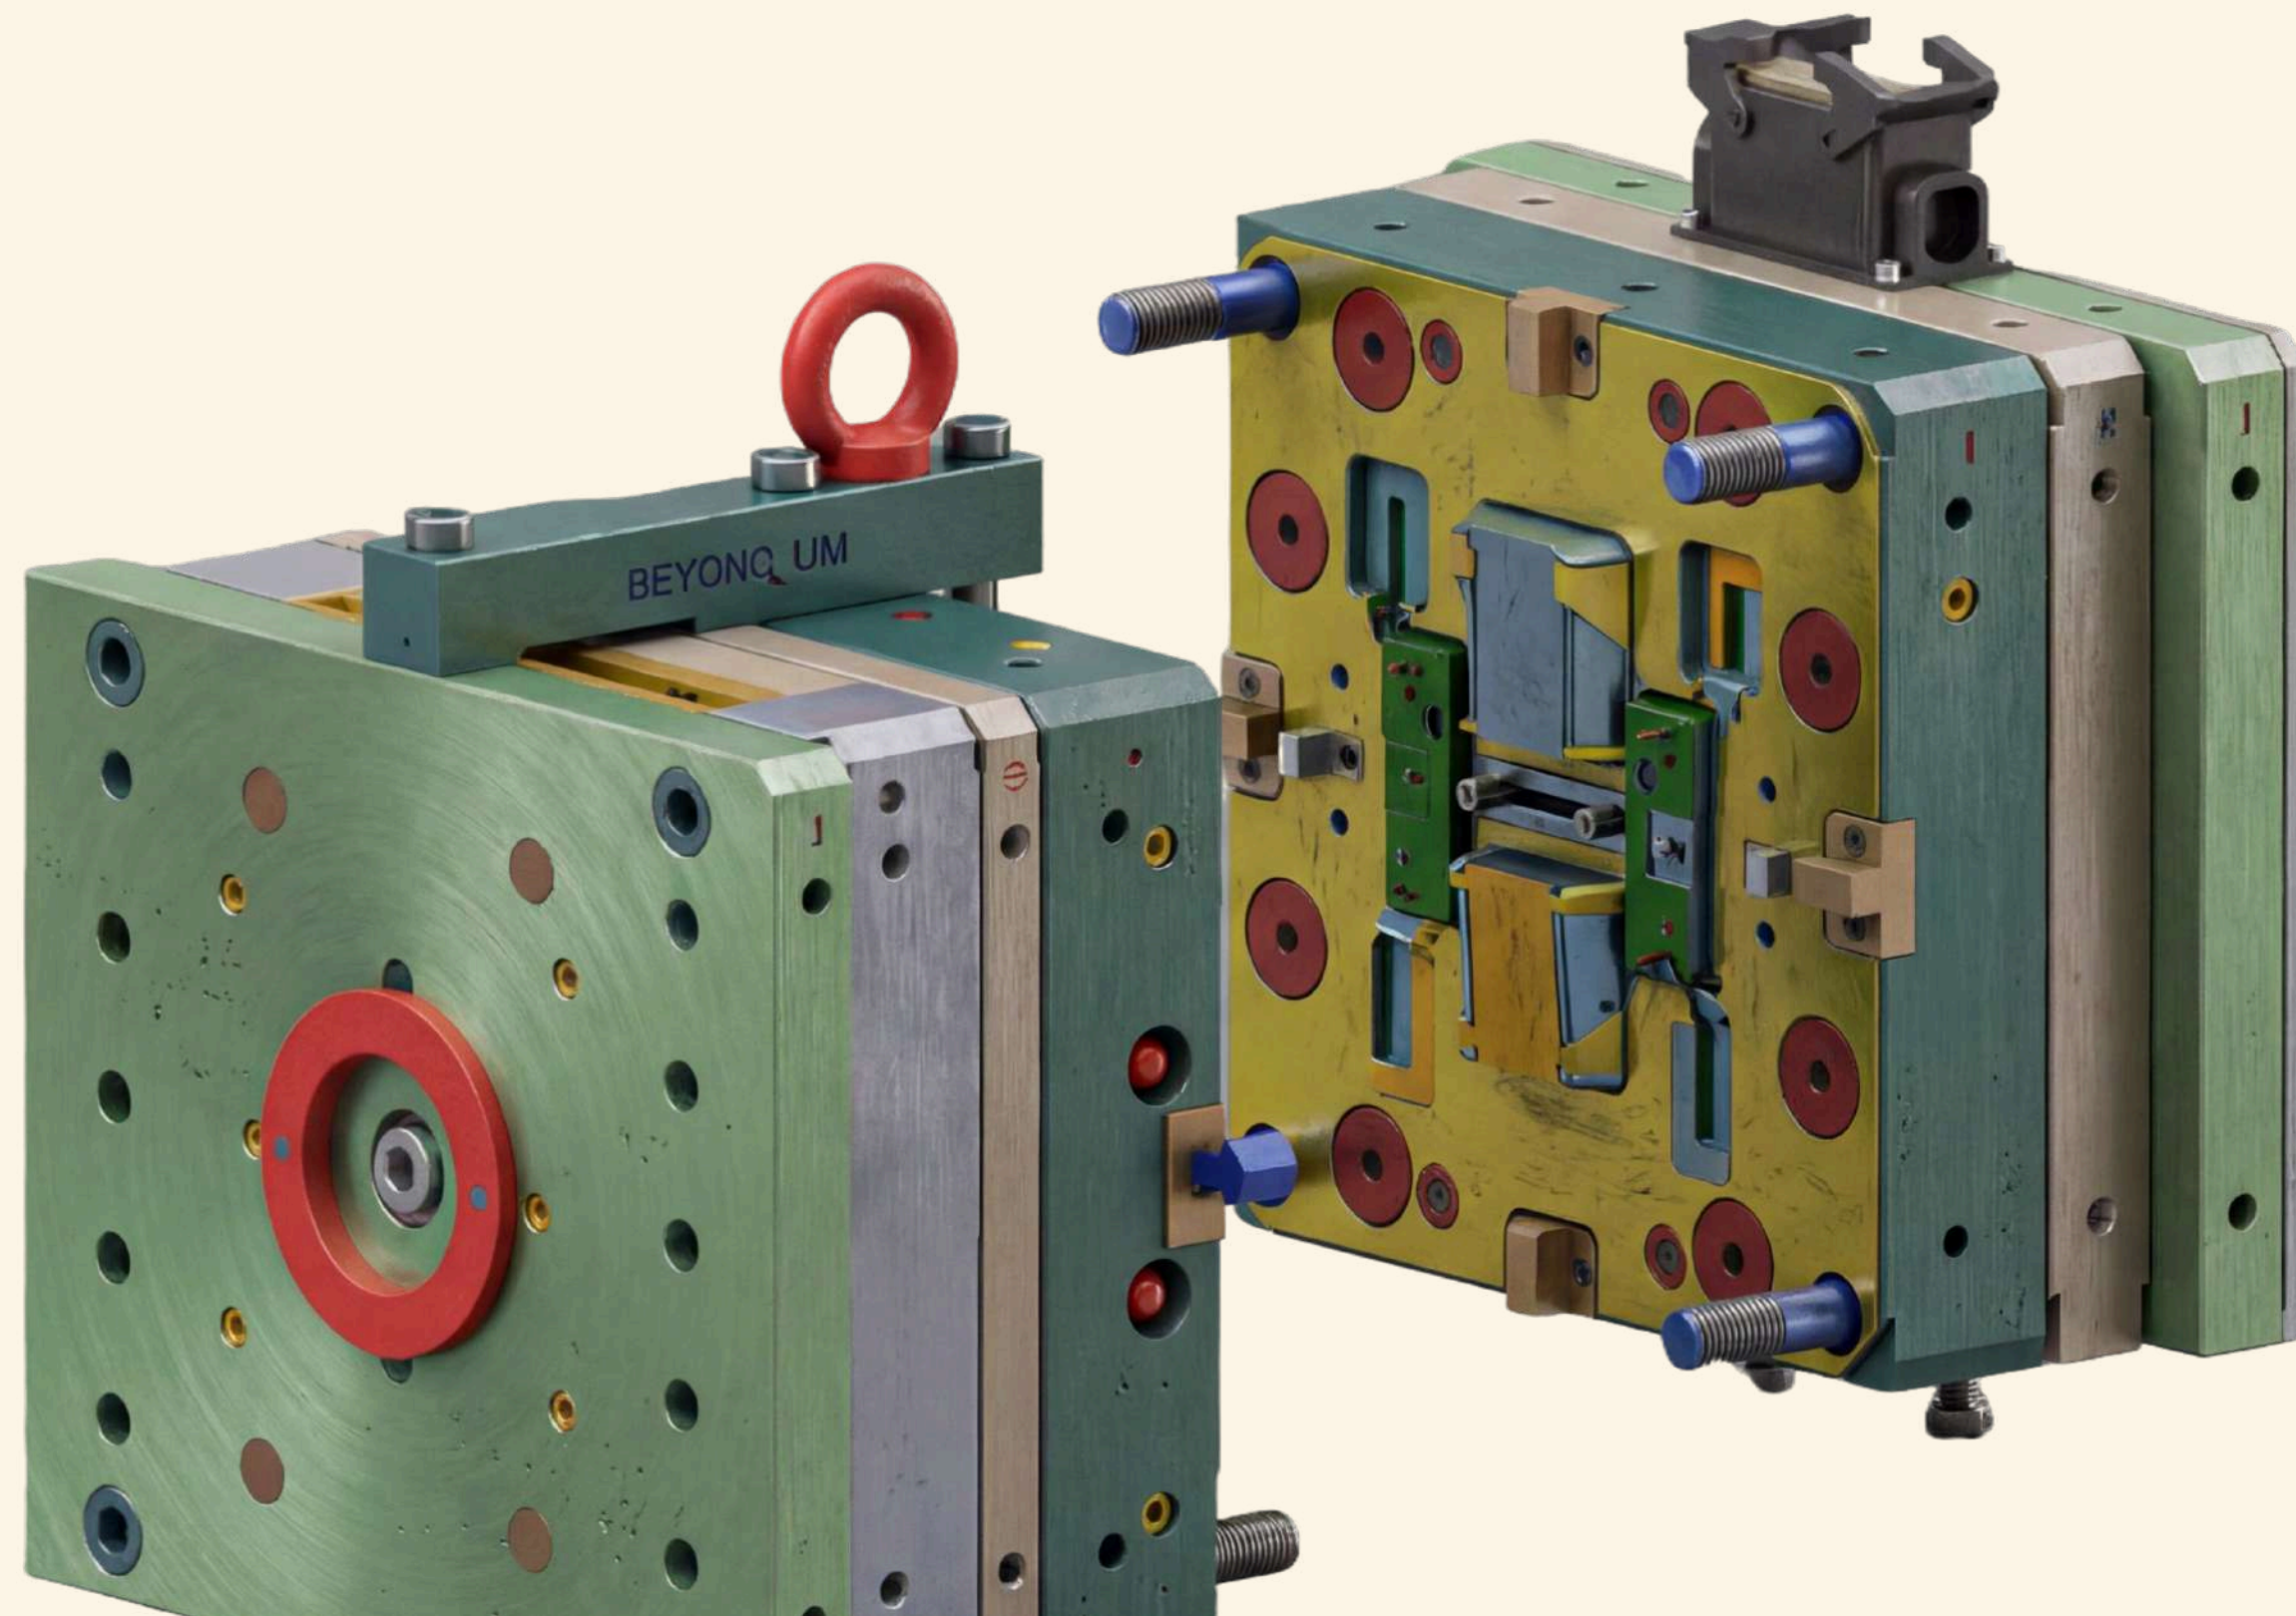

6 
axis robots

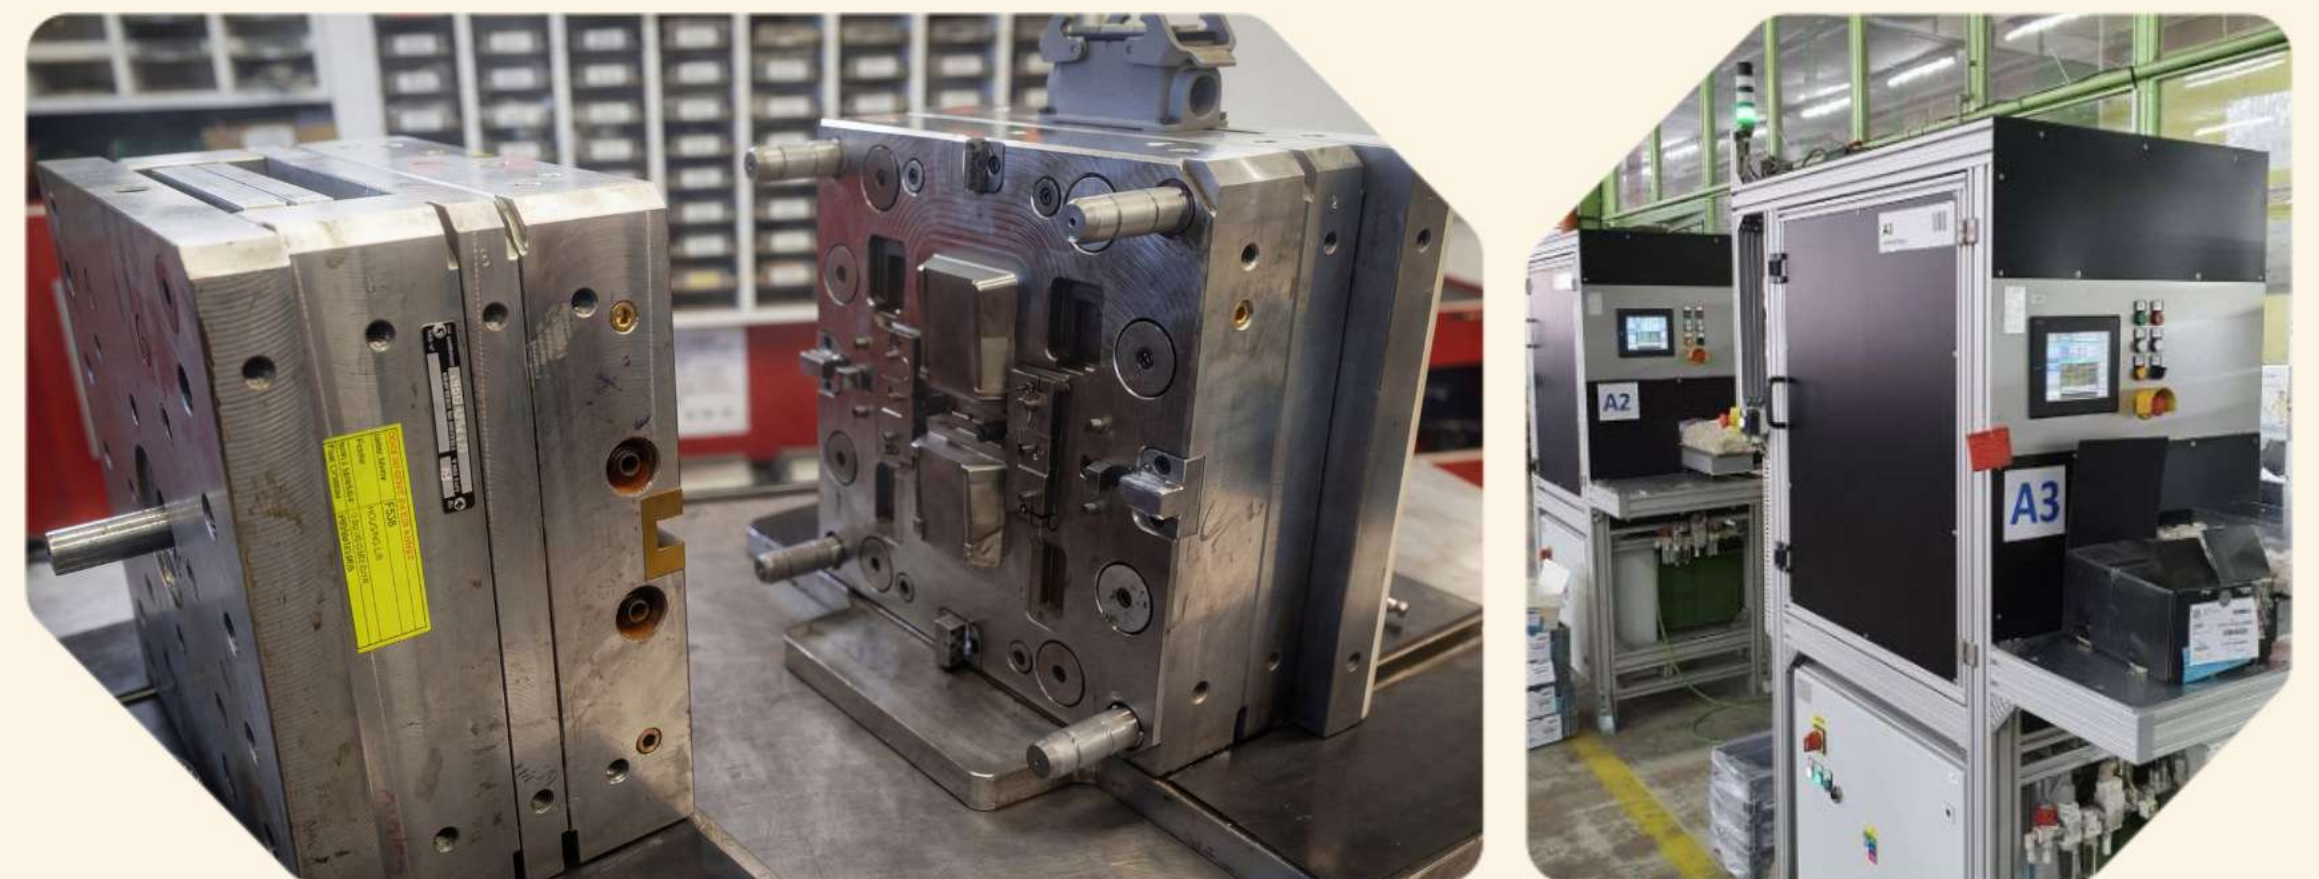

7x
automated
workplaces

Project Department

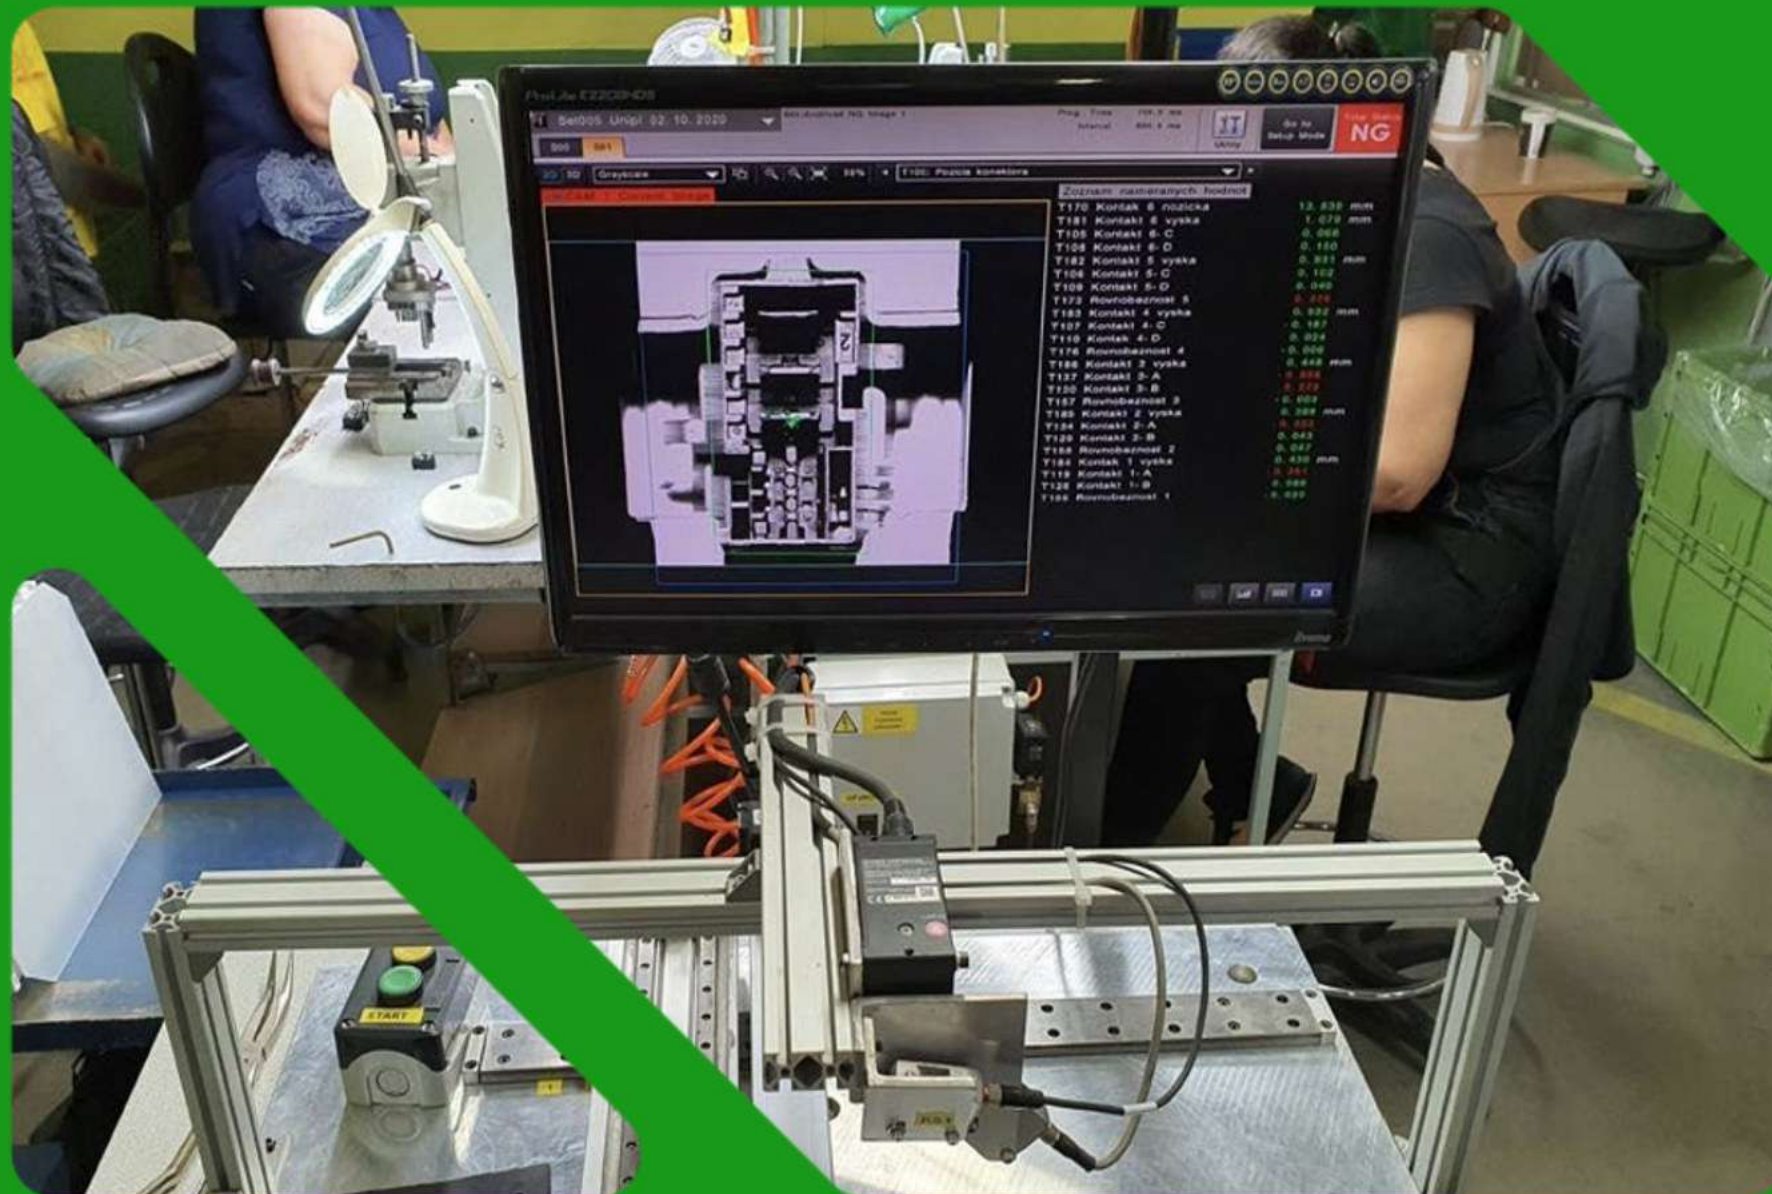

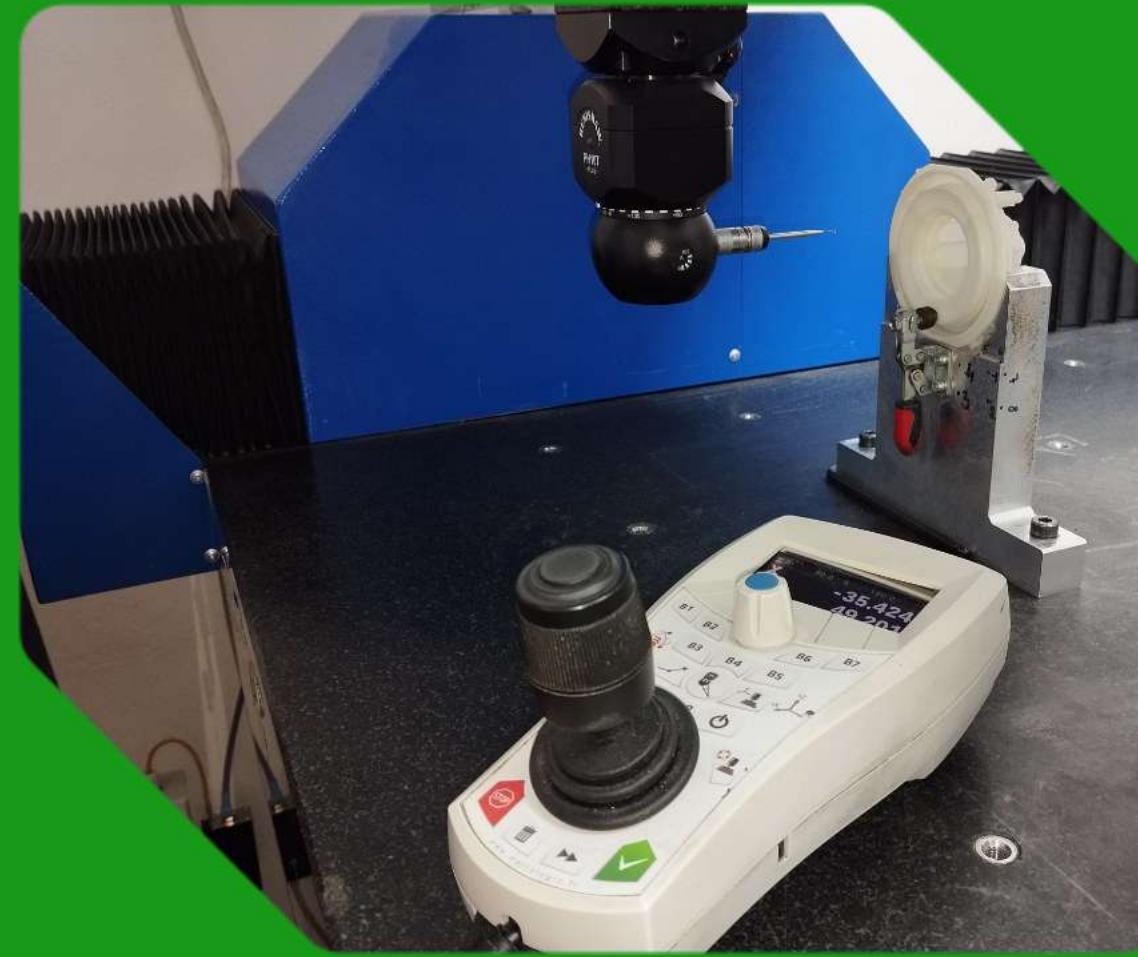

Complete service starting with design assessment, price quotation, and professional project management for customers, including the production of new molds from design to mass production.

- 01 Implementation of new injection molding and assembly projects into series production
- 02 Updating and maintaining the required parameters in ongoing projects
- 03 Consulting in the field of injection molding and mold design

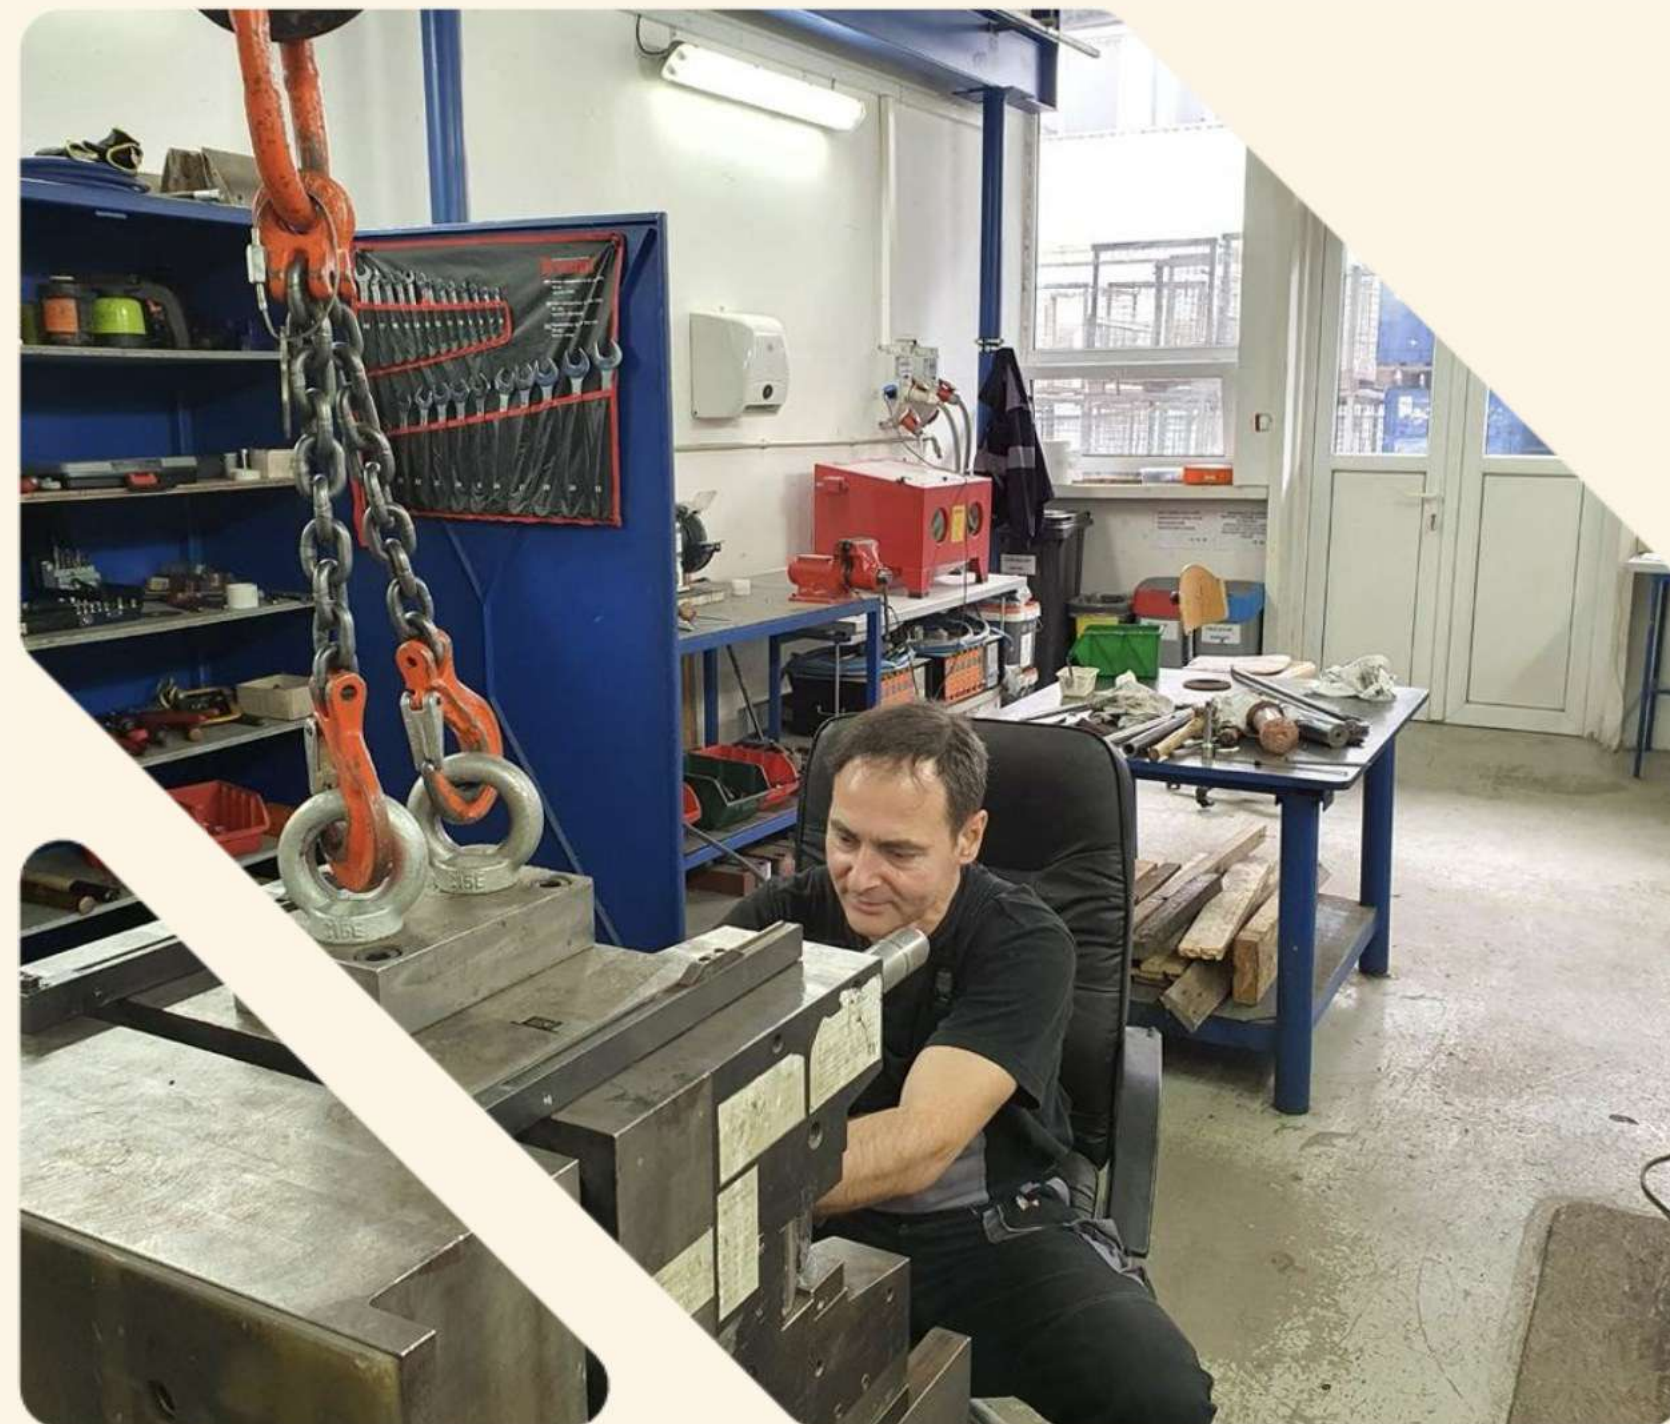

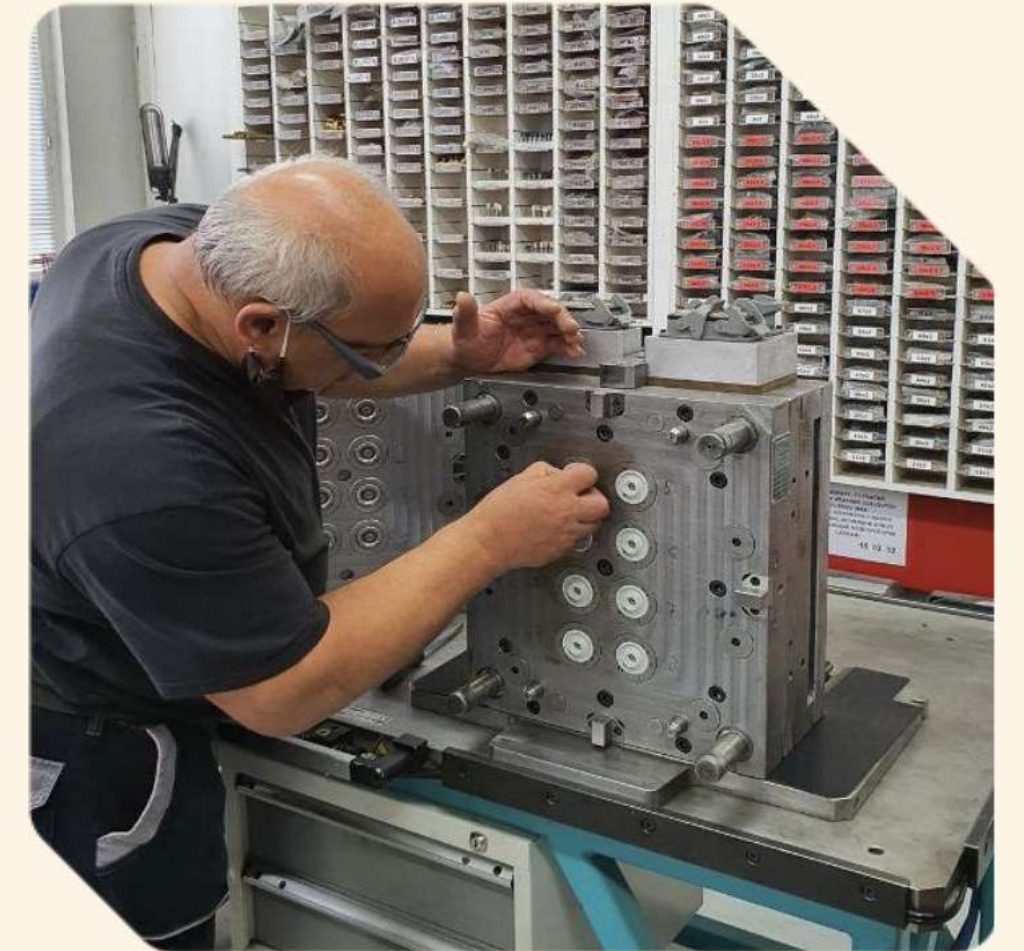

Quality measurement

Important equipment for measuring quality:

- 01 CNC 3D equipment
- 02 Quickscope camera measuring system
- 03 Photometer

Mold maintenance department

Important service equipment:

- 01 Air table for open molds
- 02 Biochemical and ultrasonic cleaner
- 03 Mold tempering tester
- 04 Laser welding in our own premises
- 05 High-speed grinder
- 06 NS machine 30,000 rpm

Logistics Department

We monitor and utilize all logistics chains important to our company that are related to the supply of raw materials, the transformation process, and the delivery of finished products to customers.

We use the QI information system at all levels.

Transport

We also provide transport through our sister company Sterich s.r.o. using Solo vehicles (12.7 t and 19.7 t) or IVECO Daily L3H3 vans (1,200 kg).

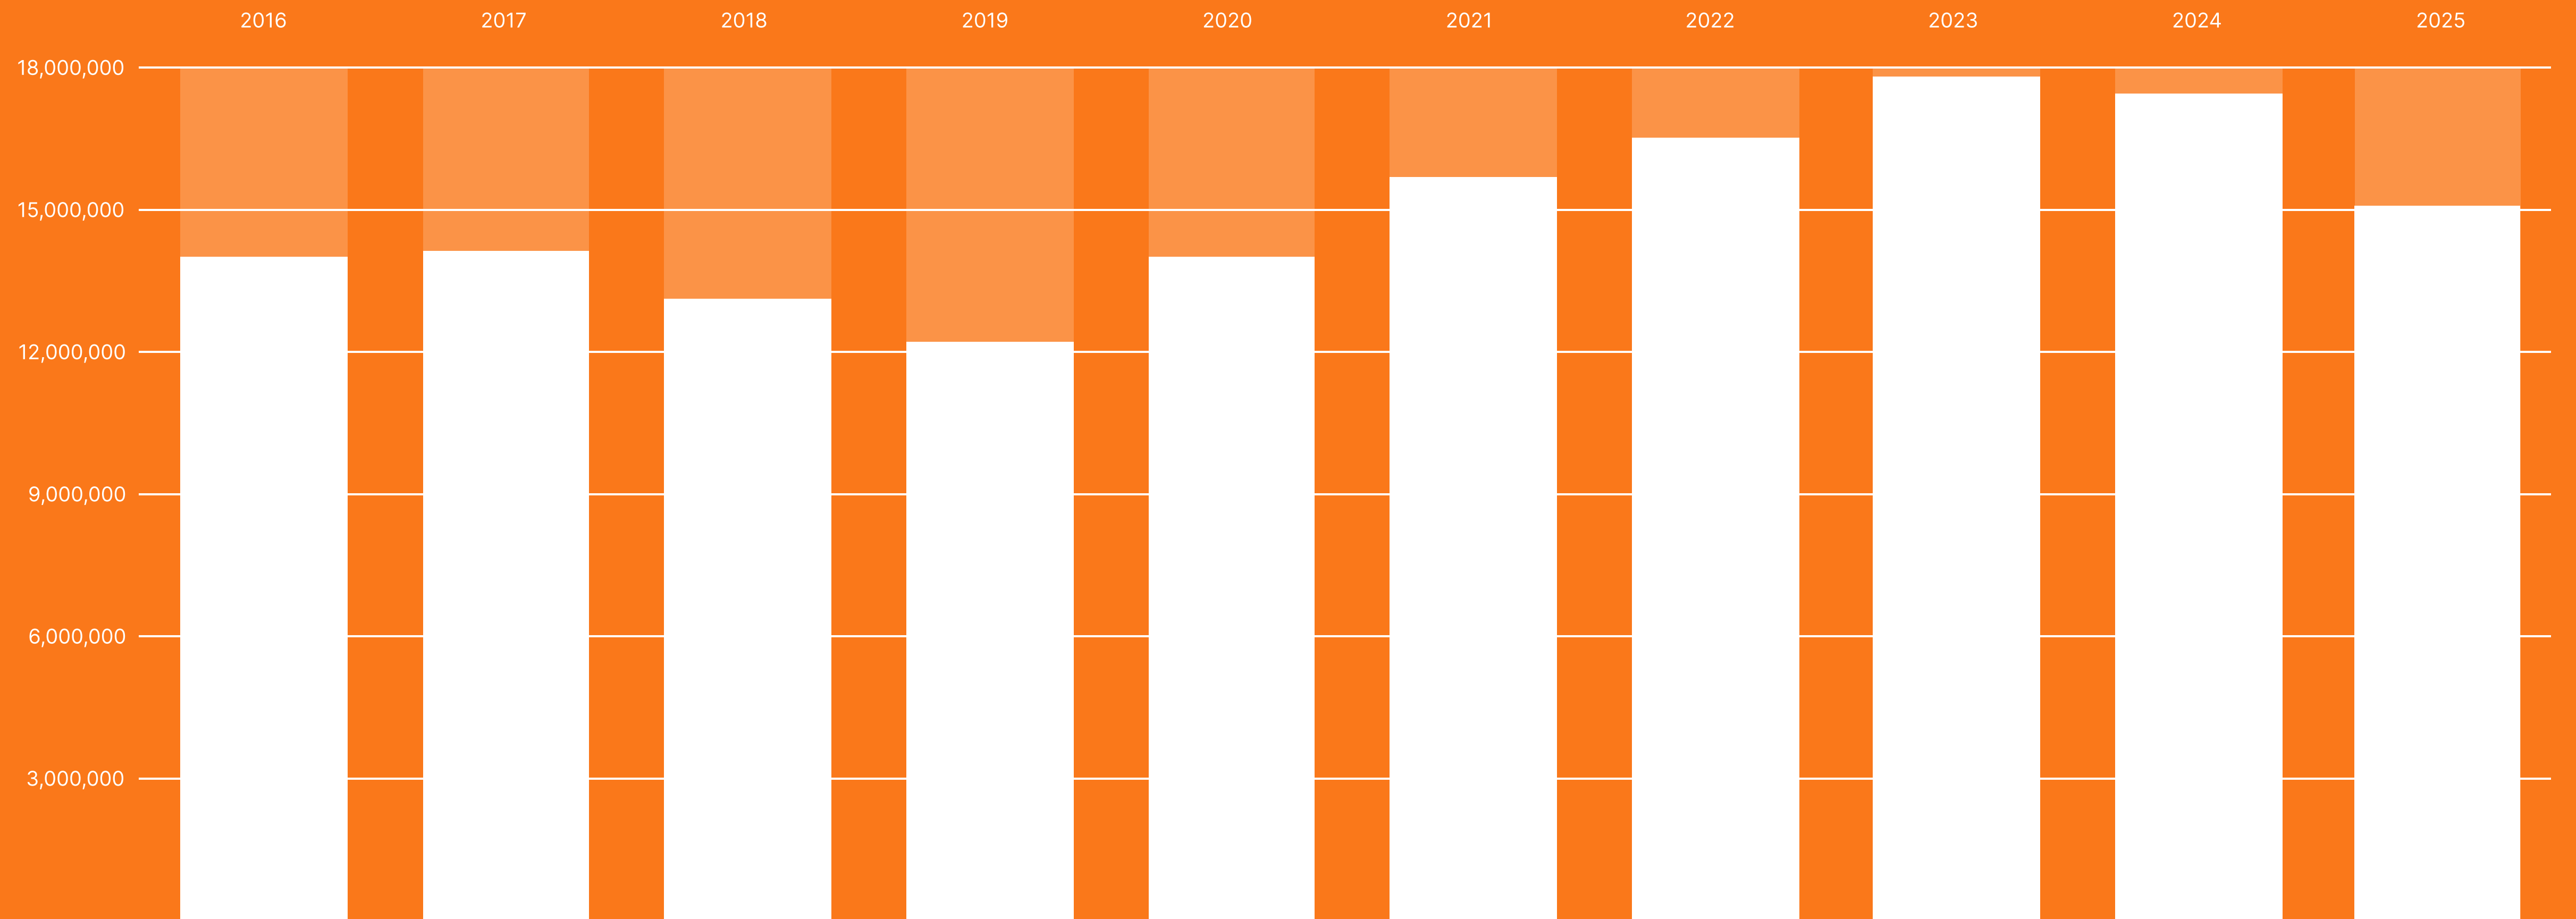

This includes:

- 01 Supply logistics
- 02 Production logistics
- 03 Distribution logistics

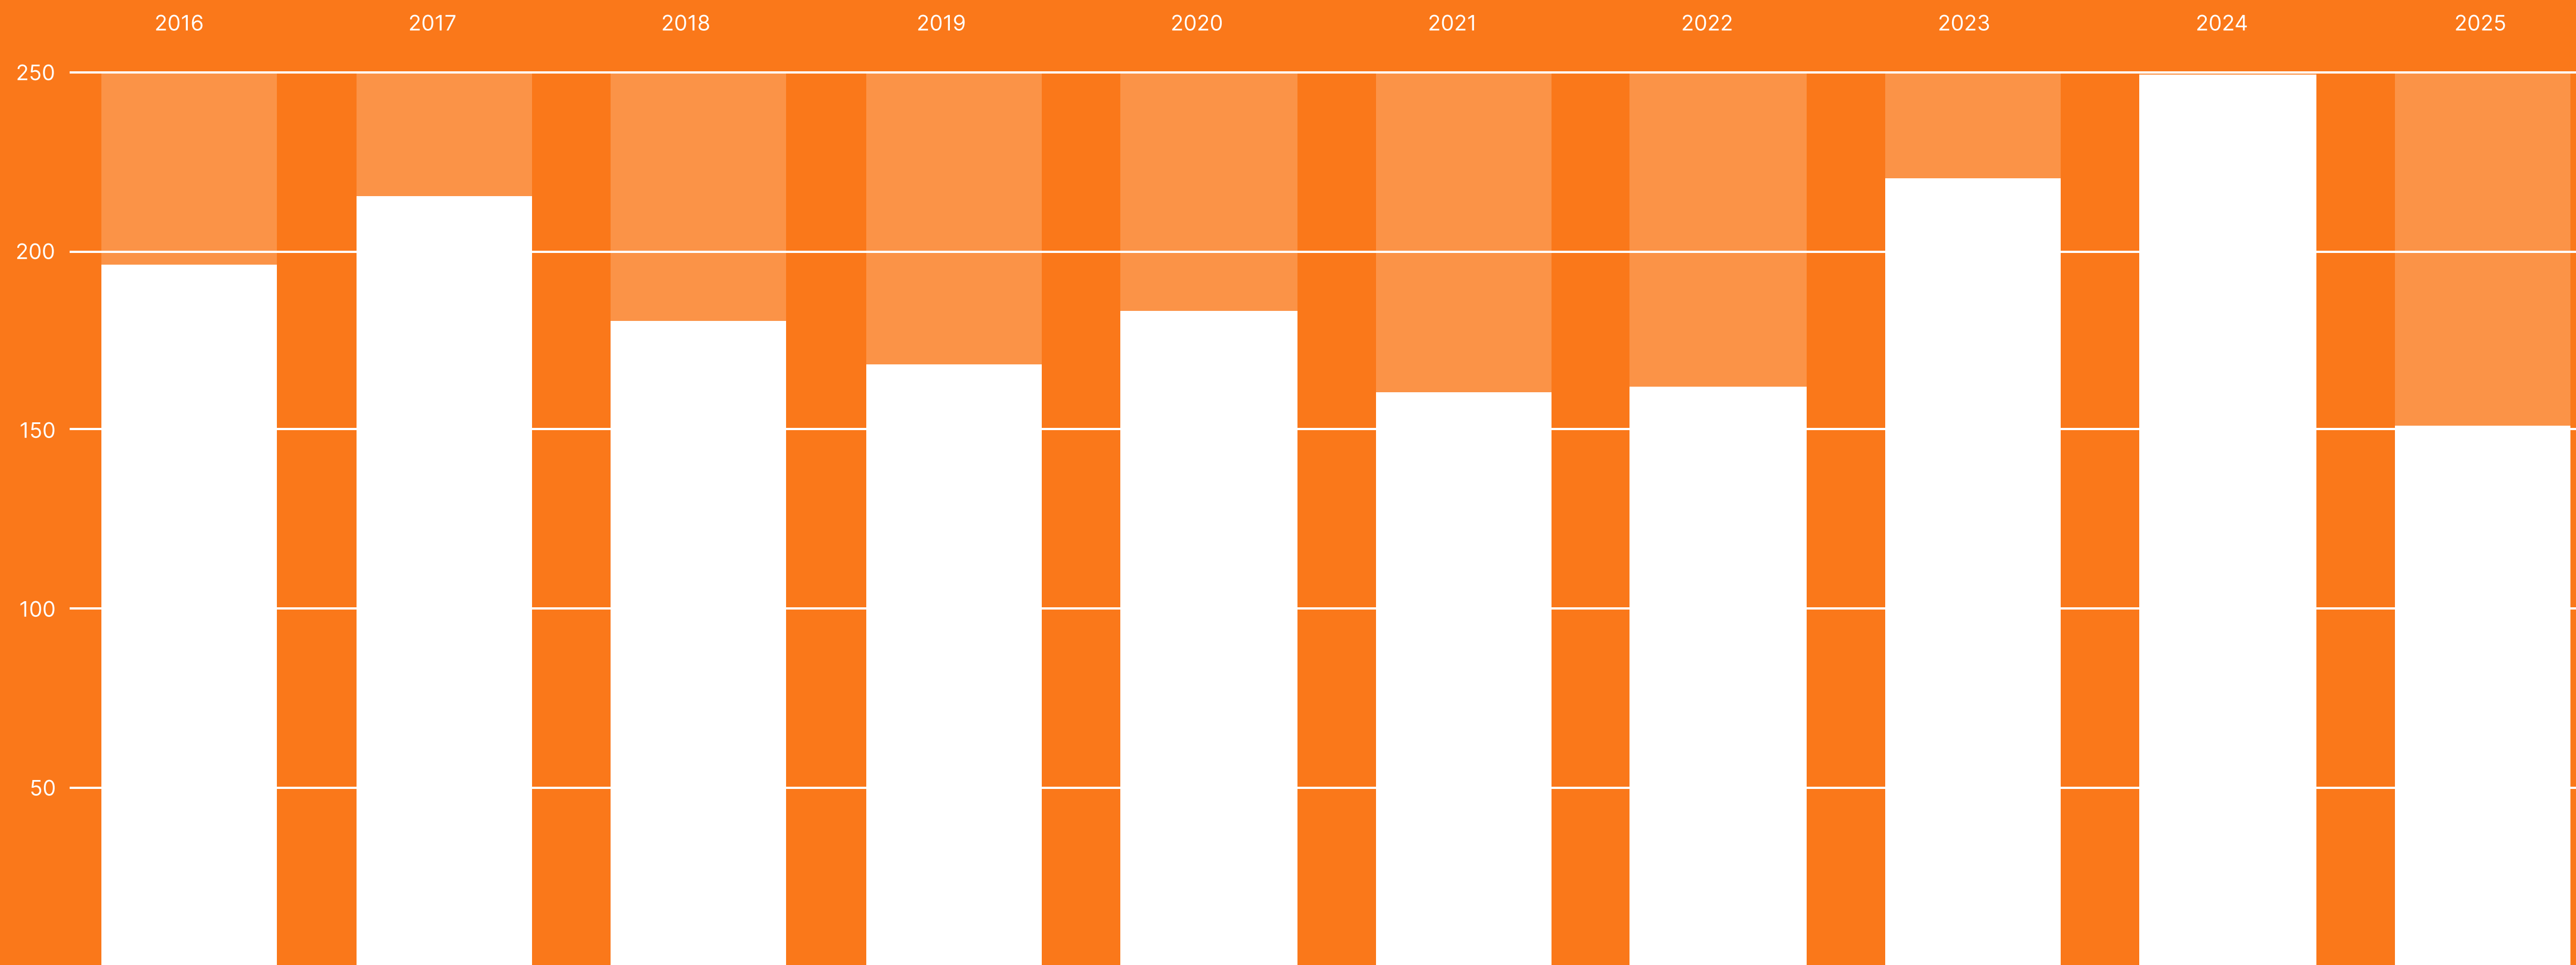

Turnover

15 046 000 € Turnover in 2025

Employees

151 employees in 2025

Customers

B/S/H/

■ BSH

■ Hella

■ ZKW

■ Melecs

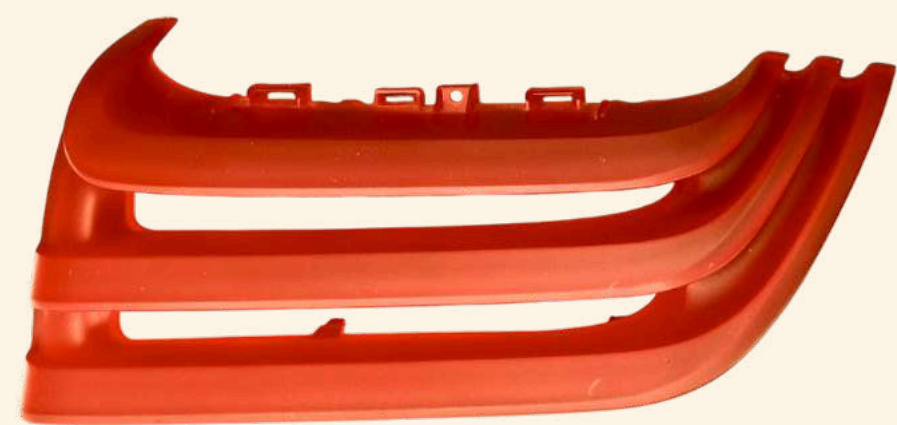

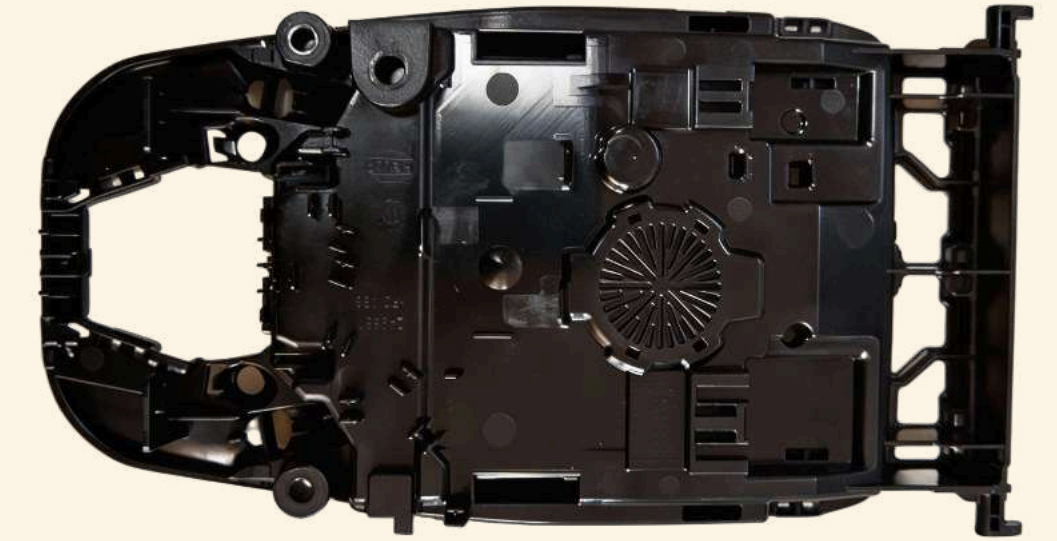

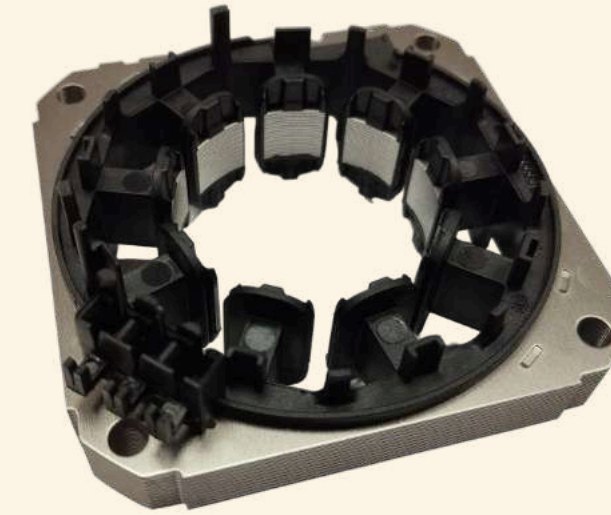

■ Cablex

■ Contitech

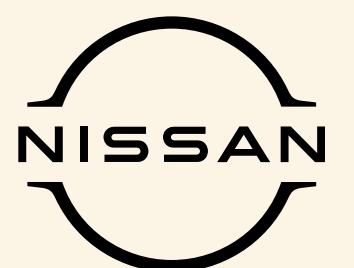

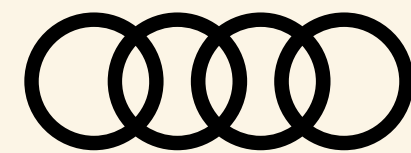

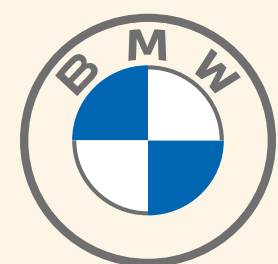

References

Product range

High demands on:

- 01 product appearance
- 02 optical properties of the product
- 03 technical characteristics of the product

Investments

2022

01

Automated workstation for external terminal

02

100 kW photovoltaic power plant on the roof

03

Replacement of injection units on 2 IMM

2023

01

Covered storage for incoming material

02

3D scanner for measurements GOM

03

Pulsating cleaner for effective cleaning of cooling channels

2024/2025

01

L45 Engel e-victory 1065/220

02

L44 Engel e-victory 1340/300
